A. Nature of Security Assistance:

Security assistance comprises the sale of defense articles and services. The grant of such articles and services without reimbursement in approved programs, economic supporting assistance in exceptional cases to offset cost of maintaining armed forces, and grant assistance to public safety forces [redacted] The Directorate of International Programs, [redacted] primarily with Foreign Military Sales [redacted] grant of defense articles and services through the Military Assistance Program [redacted] through the International Military Education and Training Program.

B. Authority:

The basic authority under which the United States provides military assistance (grant aid) and training to other nations is the Foreign Assistance Act of 1961, as amended; foreign military sales is provided under the Arms Export Control Act of 1976, as amended. These acts are subject to reconsideration annually by Congress, at which time funds needed to carry out the programs are authorized and, in addition, other amendments usually are made.

C. Responsibility:

The Directorate of International Programs in the Office of Primary Responsibility (OPR) for matters pertaining to the USAF security assistance. Their responsibilities includes

1. Security Military Assistance and Sales: Directs and coordinates USAF participation in all foreign military assistance, grant aid and military assistance service plans, policies and concepts which will further United States national interest, and national and allied materiel readiness. Provides assistance to the Office of the Secretary of Defense, Joint Chiefs of Staff, Unified Commands, Military Assistance Advisory Groups and Defense Attaches in the development of plans, policies and programs concerning foreign military aspects of International logistics. Plans for and encourages United States industry participation in international logistics activities. Advises the Chief of Staff, Air Staff agencies, Office of the Secretary of Defense/International Security Affairs, Defense Security Assistance Agency and Joint Chiefs of Staff on USAF military assistance and sales and initiates action for improvement. Represents the Chief of Staff on Ships abroad concerning foreign military aspects of international logistics matters and sponsors military assistance and sales orientation visits of foreign military dignitaries to the United States.

2. The Directorate of International Programs has been designated as the USAF focal point for military assistance and sales programs and has overall responsibility. The Director is responsible for providing central direction and guidance to the Air Staff and major commands on MAP, FMS and IMET matters.

AMERICAN/ANZUS DIVISION

UNCLASSIFIED

DECLASSIFIED IN FULL
Authority EO 13526
Air Force Declassification Office
Date: Oct 16, 2018

DECLASSIFIED

CONFIDENTIAL

GENERAL (U)

The geographic areas of responsibility within the Americas/MAGUS Division are Central and South America, the Caribbean region, Australia and New Zealand. The major countries with continued activity are Australia, Venezuela and Mexico. Countries with a potential increase in activity are Honduras, with the purchase of six A-37B aircraft; Ecuador, expressing interest in C-130H-30 (Stretch), A-37 and T-33 aircraft, and Colombia expressing interest in new transport type aircraft such as C/KC-130 aircraft and the C-130H-30. The Foreign Assistance Act (FAA) of 1982 reinstated security assistance for Argentina and Chile, subject to Presidential certification. El Salvador has also received increased security assistance with a major part being through the Military Assistance Program (MAP) and Section 506 of the FAA of 1961, as amended. The countries listed below have no major security assistance programs. The active Foreign Military Sales (FMS) cases for these countries are listed.

Country	Case	Value (Thousand)
Chile	10	109,770
Panama	16	414
Paraguay	2	15
Dominican Republic	1	2

UNCLASSIFIED

Argentina (U)

(U) Argentina had a total of 41 active cases valued at $5.7 million at the end of the reporting period.[2] Some activity was in support of US provided equipment. Activity continued to decline due to the termination of new security assistance programs on 1 October 1978, as a result of the International Security Assistance Act of 1978. The Foreign Assistance Act of 1982 reinstated security assistance for Argentina, subject to Presidential certification. Delivery of the FMS equipment to Argentina was reinstated on 29 September 1982, after being terminated as a result of the Falkland invasion.

Australia (U)

(U) The Australian FMS program includes 161 cases valued at $912.8 million.[4]

(U) The Royal Australian Air Force (RAAF) officially accepted four F-111A aircraft on 30 July 1981, under project PEACE LAND II.[5] The four aircraft were sent to depot maintenance on 3 August 1981. Aircraft A8-112 failed cold proof load test on 20 November 1981, when the right wing pivot fitting fractured.[6] Results of a joint investigation by USAF, RAAF, and General Dynamics, Fort Worth, Texas, revealed excessive stress fatigue as the cause. Delivery and ferry to Australia occurred in April 1982, for the first two aircraft. The second aircraft was ferried in August and the last aircraft was scheduled for January 1983.

(U) The RAAF has two programs underway to upgrade the F-111C aircraft. The programs are a Class V modification for the ALR-62 Radar Warning Receiver (RWR) and the acquisition of 10 PAVE TACK pods and the integration of the PAVE TACK system on RAAF F-111C aircraft.7

Brazil (U)

(U) Brazil's FMS program consists of 63 cases valued at $65.9 million.8 Most activity was in support of US provided F-5 and B-737 type aircraft acquired commercially over a number of years. The proposed tri-service International Military Education and Training (IMET) program for Brazil included in the Congressional Presentation Document (CPD) was $50,000; however, Presidential determination is required before IMET can be implemented. In August 1982, the Brazilian Government completed a direct sale of all T-37C aircraft, acquired commercially in 1973, to the Government of Korea.

Colombia (U)

(U) Colombia's FMS program consists of 26 cases valued at $21.3 million.9 USAF FY82 IMET consists of $70,080. Six of 12 used UH-1H helicopters purchased by the Government of Colombia in March 1982, were delivered 13 May 1982. The remaining six were delivered during July 1982. The Colombian Air Force continues to seek proposals from aircraft manufacturers for a new squadron of fighter aircraft. Current contenders are the Israel Aircraft Industries

(KFIR) and Northrop Corporation (F-5E and F-5G). The Colombian government approved funds of $35 million for the first stage of an air defense package.10 The first stage will consist of early warning and air traffic control radars, with the leading contender for this commercial contract being the Westinghouse Corporation's system. During the reporting period, Colombia and the Air Defense system is a hold status. A Letter of Offer and Acceptance (LOA) was presented during November for 12 A-37 aircraft and support.

Ecuador (U)

(U) Ecuador's total active FMS program value is $22.8 million with 40 active cases.11 The FY82 IMET program was $475,000. The Ecuadorian Air Force relies heavily on US IMET and FMS training. The Ecuadorian Air Force expressed continuing interest in purchasing additional A-37 aircraft. Due to the nonavailability of excess USAF A-37s and the long production lead times for new aircraft, the Ecuadorian Air Force requested and received Pricing and Availability (P&A) data for excess USAF T-33 aircraft.12

El Salvador (U)

(U) El Salvador's total FMS program for materiel consists of two cases valued at $140,000.13 IMET training for FY83 is programmed at $225,785. Funding for the El Salvador Security Assistance project is being provided under Section 506(A) of the FAA of 1961, as amended.

Date: Oct 16, 2018

Honduras (U)

(U) Honduras' total FMS program value is $13.2 million with 36 active cases.[15] During FY82, Honduras was allocated $19 million in FMS guaranteed credits and $11 million in grant aid under the Military Assistance Program (MAP). IMET for FY82 was $141,613. In August 1982, the Honduran Air Force signed an LOA for six A-37B aircraft to include spares and support equipment. An FMS credit loan agreement was utilized to finance the $8.8 million system sale.[16] Four A-37B aircraft were delivered in October 1982 and two A-37B were delivered in November 1982. Spare support was delivered during the period and additional equipment was input to the logistics system. Two Instructor Pilots (IPs) from the US AFRES force were placed on a 30 day TDY to support the upgrade training of 22 Honduran pilots in the A-37 aircraft. Both IPs returned to CONUS in December 1982.

Mexico (U)

(U) Mexico's active FMS program value is $113.9 million with 10 active cases.[17] IMET for FY83 is valued at $19,000. The Government of Mexico purchased 10 F-5E and two F-5F aircraft with deliveries in August and October 1982.[18] The Mexican Air Force (FAM) used two IPs to ferry all of the aircraft to Santa Lucia AFB, MX. All of the FAM technicians in the CONUS completed training and returned to Mexico by 5 December 1982. The launch and recovery cadre

that attended basic system training at the Inter-American Air Forces Academy and follow-on training at Williams AFB, also returned to Mexico by mid-August 1982. A $3.7 million amendment to the program for the F-5 hangars, a parking ramp and taxiway, was processed during this period. Devaluation of the peso continues to impact the project by requiring follow-on case and specialty training outside of Mexico.

New Zealand (U)

(U) New Zealand's FMS program consists of 57 cases valued at $18.9 million.[19] Most activity was in support of five C-130H aircraft acquired under FMS. On 8-10 November 1982, Air Vice Marshal David Evan Jamieson, Chief of Air Staff, Royal New Zealand Air Force, visited the Pentagon as part of the ANZUS Corridor dedication ceremony. He met with General Gabriel, Chief of Staff, General O'Malley, Vice Chief, and Lt General Welch, Deputy Chief of Staff, Programs and Resources. Discussions centered around New Zealand's desire to modernize the Royal New Zealand Air Force by replacing its A-4 aircraft.

Peru (U)

(U) Peru's active FMS program consists of 54 cases valued at $40.4 million.[20] The FY83 tri-service IMET program consists of $485,000. On 25 June 1982, the Peruvian Air Force made an unexpected request for an FMS Letter of Offer for

18 F-16/79.21 On 8 July 1982, the initial request was increased to 26 aircraft.22 When US Ambassador Frank Ortiz attempted to present the FMS data on 31 August 1982, General Huarte, Peruvian Air Force Chief of Staff, refused to receive the Ambassador to discuss the issue. In October, CENMAC Lima notified the State Department that the Peruvian Air Force was not interested in the purchase of A-10 aircraft.23 The Government of Peru formally contracted to buy 26 Mirage 2000 aircraft from Marcel Dassault in late December. Terms of the loan package were: total cost $656.0 million at 12 percent interest for 10 years.

Suriname (U)

(U) On 27 September 1982, the Secretary of Defense directed the suspension of all security assistance for Suriname.24 There were no active FMS programs with Suriname and the suspension remains in effect.

Uruguay (U)

(U) Uruguay's active FMS program consists of 24 active cases valued at $9.4 million.25 The tri-service FY83 IMET program consists of $50,000. Most activity was in support of eight A-37 Aircraft acquired under FMS. As per Defense Security Assistance Agency instructions, Description and Planning (D&P) data for F-5E, F-5F and F-20 aircraft was provided to the Government of Uruguay (GOU) in December 1981. Because of budget restrictions, it is unlikely that the GOU will pursue a purchase.

DECLASSIFIED

CONFIDENTIAL

VENEZUELA (U)

(U) The Venezuelan FMS program consists of a total of 50 active cases valued at $608.4 million.[26] Security Assistance programs remained at the same level as the previous reporting period. The PEACE SPIRIT I and II (Bell 412 and 214ST helicopters) continue to receive contractor maintenance support. Two PEACE SPIRIT helicopters and technical orders were extended for an additional year of support.[27]

(U) The Venezuelan Air Force (FAV) acquisition of a Gulfstream III aircraft (PEACE AGUA II)[28] and Cessna Citation II aircraft (PEACE CHARLIE) is continuing on schedule.[29] Aircraft interior specifications and configurations were finalized during this period. The Cessna Citation is scheduled for delivery in February 1982, and the Gulfstream III in January 1984.

(U) The PEACE DELTA program (F-16 A/B System Sale) had several significant events occur during this period. Major accomplishments were the spares and support equipment definitization, development of the training program and completion of the facility survey. The program has two outstanding issues which are affecting the final aircraft configurations: Radar Warning Receiver and Air-to-Air Missile selection.

(U) The FAV was provided with planning data for the sale of 150 AIM-9P3 missiles in November 1982, but their request for an LOA was withdrawn.[30] No major FMS cases were initiated or implemented during this period.

MOROCCO (U)

(U) The FMS program for Morocco consisted of 52 major cases for a value of $245M. These were made up of weapon system cases, munitions and training cases. The major program was the PEACE ATLAS II (F-5) program.

(U) In Nov 82, an effort was initiated by HQ USAF/PRIR to reduce a Moroccan arrearage condition by reducing the number of open Moroccan Air Force Foreign Military Sales (FMS) cases by closure and/or the reduction in value of cases where possible. If successful, the current 52 cases will shrink to approximately 24 and the value from $245M to approximately $225M.[1] The Royal Moroccan Air Force (RMAF) is working with the USAF and action is expected to continue into the second quarter of FY83.

(U) PEACE ATLAS II is an FMS case for a value of $182.9M for 16 F-5Es and four F-5Fs. At the 7-8 DOC E2 Program Management Review (PMR), the RMAF was apprised of the current status of all aspects of the PEACE ATLAS II Program. The in-country retrofit effort for nine F-5Es and four F-5Fs and training of maintenance personnel will take place beginning the first quarter of CY83. There is now sufficient power at Meknes AB. To date, 14 F-5E have been delivered (ten F-5Es and four F-5Fs). The remaining six F-5Es (retrofitted in CONUS) are scheduled for delivery by direct commercial contract in Jan 83.[2] The contract costs are to be paid by the PEACE ATLAS II Program as authorized by Defense Security Assistance Agency (DSAA). Of the ten

Date: Oct 16, 2018

originally delivered F-5Es, nine remain.

(U) Morocco requested one space in the F-5 Fighter Weapons Instructor Course (FWIC). An LOA for one space beginning in Feb 82 was processed and accepted by Morocco. Case value was $326,068. The course was changed to F-5E Advanced Fighter Training due to the student's lack of qualification for FWIC. The student completed the revised course 24 Aug 82.

(U) An LOA for a Technical Assistance Field Team (TAFT) consisting of one F-5E/F Instructor Pilot (IP) for a period of 18 months was requested. Due to funding problems, the TAFT IP requirement was incorporated in the PEACE ATLAS II program. The TAFT arrived in Morocco 28 Jul 82.[3]

(U) In Jan 82, Morocco requested an LOA for 375 AGM-65B Maverick Missiles. The LOA, value $28.2M, was sent to DSAA in May 82 for countersignature prior to being sent to Morocco. DSAA held the LOA pending a determination of a method of funding until Oct 82. Following an Oct 82 visit by the RMAF/CC to DSAA[4] the LOA with revised value of $36.8M was released to Morocco (Nov 82) unsigned for planning purposes only. The RMAF advised the USAF during the Dec 82 PEACE ATLAS II PMR that they would not accept the LOA, as it was too expensive.

(U) During Apr/May 82, Morocco requested an LOA for four AN/AVQ-27 Laser Target Designator Sets (LTDS), 400 PAVEWAY II Mark II Laser Guided Bomb Units (GBU 12E/B) and 100 GBU 10F/B for use with the MK82 and MK84 bombs. DSAA directed

DECLASSIFIED

the GNAF to proceed with LOR development in May 82, but also held this up until after the Dec 82 RMAF/CC visit.[4] The LOA with a value of $14.96M is to be sent to Morocco during Jan 83 unsigned for planning purposes only.

(S) On 20 Jan 82 Morocco requested an LOA for 500 MK20 Rockeye II CBUs. In Jun 82, DSAA directed the USAF to sponsor an acceptance to National Disclosure Policy (NDP) for Rockeye (approved 10 APR 82), but to hold LOA preparation in abeyance.

(U) Following an Dec 82 visit by the RMAF/CC the USAF was directed to prepare the Rockeye LOA.[4] In Dec 82, the LOA, value $6.5M, was hand carried to Morocco by DSAA, accepted and implemented.

(U) In Nov 82, Morocco requested and received an in-country briefing on the A-10 aircraft. The RMAF/CC indicated that Morocco, though it felt the aircraft was good, was not in a position to purchase the A-10 or any other aircraft at that time or in the near future.

(U) In Feb 82, Morocco indicated a desire to retire some of their F-5A/B aircraft. In Apr 82, the Government of Turkey transmitted a formal request to acquire 12 Moroccan F-5A/B Aircraft. As of 31 Dec 82, no price/terms have been agreed upon.

Nigeria (U)

(S) The FMS program to Nigeria consists primarily of training. This training included flying training.

DECLASSIFIED

Reviewed Air Force Declassification Office
IAW EO 13526, Section 3.5
Date: Oct 16, 2018

technical, and professional training.

(U) There are currently two active blanket Order training cases (NI-D-TAT and TAX) with a total value of $13.5M. Nigeria is still scheduling approximately 100 trainees per year. Nigeria has a high regard for USAF training, but experiences frequent forfeitures due to internal scheduling problems.

(U) Nigeria continues to have problems with timely payments on its FMS cases. The latest being the delayed initial deposit ($2.864) for their CTR3/84 training case NI-D-TRB (value $16.40M). The case was accepted 6 Dec 82 without the accompanying deposit.5 If payment is delayed the Nigerian Air Force will be unable to order additional training as the ordering period of the other cases expires 31 Dec 82. DSAA authorized Nigeria to use up to $1.75M of freed funds from the closure of several completed cases toward the CTR3/84 training case initial deposit.

Tunisia (U)

PEACE CARTHAGE 312 - C-130 Sale (U)

(U) An LOA for 2 C-130H aircraft valued at $56.7M was presented to Tunisia in Aug 82. The LOA expired on 30 Oct 82 with no sale.

PEACE DREM III (U)

(U) The P-5 Definitization conference was held at San Antonio Air Logistics Center 2-17 Aug 82. On 30 Oct 82 the

 DECLASSIFIED

Reviewed Air Force Declassification Office
IAW EO 13526, Section 3.5
Date: Oct 10, 2018

case value was increased to $208,432,871. The original LOA was written for 6 F-5Es and 6 F-5Fs. Amendment one changed the purchase to eight F-5Es and four F-5Fs.6

Sudan (U)

PEACE RATH II - F-5F Aircraft (U)

(U) Two F-5F aircraft (PEACE RATH II) were delivered to Sudan on 18 Oct 82. Over 90 percent of the spare parts and 80 percent of the support equipment have been delivered to Sudan. Manpower and facilities remain inadequate.

(U) The program value is $39.6M. In Nov 82 a logistics officer was assigned to the OMC for 179 days TDY to help establish a National Logistics system. Two Program Management Reviews (PMRs) were held in Sudan. The first PMR was held 14-18 Aug 82 and the second PMR was held 20-24 Oct 82. These reviews provided status to Sudan regarding the Oct 82 aircraft deliveries/support.

Kenya (U)

PEACE DRUM (F-5) Program (U)

(U) The PEACE DRUM program (FMS Case KE-D-EBA) provided two F-5E and two F-5F aircraft, support equipment and training support for Kenya. Aircraft were delivered in Mar/Apr 76 at an estimated value of $67M. Deliveries of follow-on support equipment are continuing through logistics requisitions. Two additional F-5F aircraft (PEACE DRUM II) were purchased under FMS Case KE-D-SDA and delivered by Northrop direct

ferry to Kenya in Jun 82 at an estimated value of $13.5M.

(U) Kenya's Aug 82 coup attempt involved a large number of its 2,500-man Air Force. The Kenyan Air Force (KAF) was disbanded and reorganized as "82AF" under the leadership of the Deputy Army Commander.

(U) After the Aug 82 aborted coup attempt, 82AF was formed around the cadre of Air Force personnel cleared by Kenyan authorities. Nanyuki AB was renamed Laikipia AB, Eastleigh AB was renamed Moi AB and the Air Force uniforms were changed. Kenyan Air Force personnel investigations are on-going.

(U) Shortly thereafter, the Kenyan Government requested that an F-5 Instructor Pilot (IP) be sent to Nairobi to assist with their F-5 program. Two qualified IPs were selected (an IP for a one month TDY assignment and another IP for a one year PCS assignment). These services were provided under PEACE DRUM (FMS Case KE-D-SHA) at an estimated value of $75,000.

(U) The Kenyan Government also expressed a desire for undergraduate pilot training (UPT) and reinforcement of its air defense capabilities. During Sep 82, Kenya requested UPT for fourteen students. Services are being provided during the Nov 83 - Mar 84 time frame under FMS Case KE-D-TAF at an estimated value of $2.8M.

(U) During Oct 82, Kenya requested a Radar/Air Defense Survey Team to conduct a survey of its radar/air defense needs. A nine-man USAF/USA team was identified and Terms of

DECLASSIFIED

Date: Oct 16, 2018

Reference (TOR) were established. Services will be provided during mid-Jan 83 under FMS Case KE-D-NAL at an estimated value of $52,324.

(U) One F-5E crashed in Nov 82 due to pilot error, bad weather and lack of pilot experience.

(U) In Nov 82, Kenya requested a Technical Assistance Field Team (TAFT) consisting of civilian contractor to provide maintenance of their F-5 aircraft and provide on-the-job training (OJT) to the Kenyans during Feb 83 - Jan 84. The source (contractor or USAF) and timing of TAFT availability are undetermined.

Somalia (U)

(U) Somalia purchased three TPS-43F tactical radars, support equipment, spares, tech services, and training under FMS Case SO-D-DAA (PEACE HORN). The LOA was signed in Apr 81. Radars are currently being built and are scheduled for delivery at the contractor's plant during Jun, Oct and Nov 83. Installation in Somalia is scheduled for Jan, Feb and Mar 84. The first radar produced will be used at Westinghouse to train a Somali cadre from Jul through Dec 83. Thirty officers of the Somali Air Defense Force (SADF) are currently in the US for training in English language, electronics, radar operation and maintenance, power production and air conditioning.

(U) In Dec 82, the first PEACE HORN PMR was held at McClellan AFB, CA. Representatives from HQ USAF/PRIS, AFLC

Air Force Declassification Office
Date Oct 16, 2018

DECLASSIFIED

ILC, Sacramento ALC, ATC, USOMC Magadiscu, Westinghouse Electric and the SADF met to discuss program status and problem areas.?

(U) The Language Training Detachment (LTD) established in Somalia under FMS Case SO-D-TAB is functioning well.

ZAIRE (U)

C-130 PROGRAM (U)

(U) Zaire purchased seven C-130B aircraft during the 1971-1977 time frame. Unfortunately, two C-130s have since been crashed leaving Zaire with only five C-130s. Of the remaining five C-130s, two are grounded in Zaire due to lack of engines, two are being held in Italy by the Stai-Marchetti firm pending payment for maintenance work and one is reserved for the use of the President. The C-130 program for Zaire consists primarily of on-going C-130 support deliveries, repair and return of nonstandard support items and follow-on FMSO II cases.

(U) Zaire remained under Brooke Amendment sanctions during Jul - Aug 82 due to non-payment of FMS loans. These sanctions prohibit the start of any new Security Assistance programs, including follow-on training, while they are in effect. During Sep 82, Brooke Amendment sanctions were officially lifted.

(U) After coming from under Brooke Amendment sanctions, Zaire requested a one year and eight month extension of the current Defense Language Institute (DLI) language instructor

DECLASSIFIED

Page determined to be Unclassified
Reviewed Air Force Declassification Office
IAW EO 13526, Section 3.5
Date: Oct 16, 2018

under FMS Case CX-D-IAJ at an estimated value of $57,108; a new $4 million two year language instructor under FMS Case CX-D-IAH at an estimated value of $146,874; and a Weapons Systems Logistics Officer (WSLO) at an estimated value of $206,000.

(U) It is suspected that Zaire will be placed under Brooke Amendment sanctions again in Jan 83 due to credit arrearages. There are continued financial management problems in Zaire.

Egypt (U)

(U) In Jun 80, the Government of Egypt signed an LOA to purchase 40 F-16A/Bs and a full complement of support equipment, spares, munitions, training and technical service support. FMS Case EG-D-SNA, PEACE VICTOR I, was established to provide these aircraft on an accelerated schedule (21 months versus the normal 42) at a cost of $935M. By the end of Dec 82, 18 of the F-16s had been delivered, all on schedule. Some of the other key events in this program during this period were as follows:

a. (U) Program Management Review IV was held in Dayton, OH, in Oct 82. A large contingent of Egyptian Air Force (EAF) officers attended, headed by Maj General Mohamed Abed Rahman, Deputy Chief of Operations, EAF.

b. (U) The F-16 Operational Flight Trainer (OFT) was scheduled to be delivered to Anshas Ab, Egypt, in Nov 82. Due to difficulties in constructing the new facility which

Page determined to be Unclassified
Reviewed: Air Force Declassification Office
IAW E.O 13526, Section 3.5
Date: Oct 16, 2018

will house this equipment, shipment of the OFT was delayed to Jan 83.[8]

c. (U) In Dec 82, Lt Col James "Rick" Nichols, Commander of the USAF F-16 TAFT at Anshas AB, was killed in an automobile accident in Egypt. Lt Col Bruce Bunker of the USAF was selected to replace Nichols and is scheduled to arrive in Egypt in late Jan 83.[9]

PEACE PYRAMID PROGRAM (U)

(U) The 20 C-130H aircraft sold to Egypt under PEACE PYRAMID I (six aircraft) and PEACE PYRAMID II (14 aircraft) have all been delivered. The delivery of necessary support for these aircraft is nearly complete and final closeout is anticipated in FY83.

PEACE PYRAMID I & II (C-130H) Training (U)

(U) The Egyptian Air Force (EAF) continued training on intermediate level shop support with Lockheed Contractual Engineering Technical Services (CETS) and USAF TAFT personnel, which numbers 11 enlisted and one officer. This should continue for two years.

PEACE REED C-130 Support (U)

(U) PEACE REED is an assortment of follow-on support LOAs, all given the name PEACE REED for administrative control, for C-130s purchased under PEACE PYRAMID. This program is funded under an FMS credit agreement. Support functions are operating properly and the C-130s are meeting EAF

operational requirements. Over 90 percent of the shop equipment ordered in Jun 82 has been shipped to the freight forwarder. This equipment has been ordered to give the EAF a depot level repair capability in some areas.

PEACE PHARAOH (35 F-16B) Program (U)

(S) The items scheduled for delivery under PEACE PHARAOH have been delivered with very few exceptions. Two hundred and fifteen requisitions of the original 18,200 input for spares are undelivered. Follow-on support LOAs are now providing necessary items to the EAF. The TAFT has decreased from a high of 110 to 42 assigned personnel with continued phase-out by attrition. The EAF has decided to continue to use Hill AFB, Utah, for programmed depot maintenance on the remaining 26 aircraft in FY83-85.

(S) A DOD/USAF team conducted discussions with the Turkish Air Force relative to the potential transfer of EAF F-4s. The Egyptian Minister of Defense requested the DOD to obtain USG approval for a transfer to Turkey during a visit to the US. DSAA submitted notification of the proposed transfer for Congressional approval. However, no agreement has been reached between Egypt and Turkey on the transfer.

(U) "Stop Work" and show cause notices were issued to System Sciences Corp because they have not provided the software capability requested for the Integrated Logistics System (ILS).

DECLASSIFIED

(U) Final determination on recommendations for alternatives to System Sciences Corporation is pending. The delay in achieving operational status for the ILS is estimated to be at least one year from the date a software contract is awarded.

(U) During this period the PEACE LUXOR LOA for 40 ALQ-131 ECM Pods (EG-D-TGR), valued at $71M, was signed.

Kuwait (U)

(U) FMS to Kuwait is limited to training. There are three active Blanket Order Training cases (FY81 KU-D-TAT, FY82 KU-D-TBK, FY83 KU-D-TBA) which provide professional military education and technical training. Total value of these three cases is $6.6M. Initial staffing of the request for training during FY84 indicates value of new case will be $1.5M.

Oman (U)

PEACE UNION (U)

(U) Oman's third C-130H is scheduled for delivery in Mar 83. Amendment #2 to MU-D-SCA which added a fourth C-130H has been declined by Oman. Oman expects to resubmit the request for a fourth C-130H at a later date for delivery in CY86. Oman is pleased with the C-130H program to date.

PEACE ARROW (FIM-92G) (U)

estimated we are within one year of closing the case. The Israelis have shown a strong interest in purchasing a frontal capable missile, i.e., either the AIM-9L or the improved AIM-9P in the FY84 time frame.

(SECRET) (U)

PEACE PANTHER (U)

(U) FMS case IS-D-YAA includes 24 A&U-10 Forward Looking Infrared (FLIR) units, training and support equipment. All units have been delivered.

PEACE DAGGER (U)

(U) The PEACE DAGGER Letter of Offer and Acceptance (LOA) (IS-D-YAU) provided for 274 AGM-65B units. All units were delivered in Oct 82. The Government of Israel (GOI) has requested a guidance unit test set which is compatible with both the A and B model of the AGM-65.

PEACE FOX (U)

(U) The sale of F-15 aircraft to Israel consists of three separate programs, PEACE FOX I, II, and III.

(U) Under PEACE FOX I (IS-D-SBF), 25 F-15s were delivered to Israel during CY76-78. This program is nearing completion with over 99 percent of ordered articles/services delivered.

(U) PEACE FOX II (IS-D-SBP) involved the sale of nine F-15C and six F-15D aircraft. As of Apr 82, all 15 aircraft had been delivered. Total sale value is estimated at $372M

which includes spare parts, support equipment, technical assistance and training aids.

(U) PEACE FOX III is a new order. The LOA was signed 7 Jun 82. It is for nine F-15Cs and two F-15Ds plus conformal fuel tanks, support, and spare parts totalling $485M. First delivery is scheduled for Nov 84.

EGOR II: Cruciform Wing Weapon (U)

(U) The GOI has requested a fourth buy (IS-D-YCY) for 70 GBU-15s and an increase to 100 units in the third buy (IS-D-YAW). These increases will bring total Israeli GBU-15 sales to 370 units.

PEACE MARBLE Program (U)

(U) The PEACE MARBLE I program involves the sale of 75 F-16 aircraft, spare parts, support equipment, technical assistance and training aids. The last aircraft was delivered in Sep 82.

(C) A proposed follow-on sale of 75 additional aircraft has been placed on hold by DOD/State. The original GOI request included extensive coproduction and offset provisions. This program has been designated PEACE MARBLE II.

JORDAN (U)

Grant Aid/FMS Programs (U)

(U) The FMS program for Jordan amounts to 100 open cases with a value of $188.2M. Grant AID consists of 133 open lines with a value of $25.5M.

Page determined to be Unclassified

PEACE RANGE (U)

(U) PEACE RANGE is the sale of two TPS-43 radars to Jordan to be integrated into the air defense system (I-HAWK). The major items of equipment (radars, operations/communications shelters, antenna) are in production and will be available for installation in-country FY 83.

Joint Military Commission (JMC) (U)

(U) The US-Jordan JMC was held in Washington Dec 82. US USAF personnel met with the commander of the Royal Jordanian Air Force (RJAF) and members of his staff to discuss topics of importance to both parties. The next JMC has tentatively been scheduled for Apr 83 in Amman.

T-37 Program (U)

(U) The status of the T-37B lease agreement remains unchanged. The T-37 has not yet been determined excess to the USAF and cannot be purchased by Jordan. The lease on the five aircraft is effective until Jul 83. At the Dec 82 JMC, the USAF agreed to support RJAF training aircraft requirements until a new trainer is available but was unable to lease additional aircraft.

Jordan Training (U)

(U) The Royal Jordanian Air Force (RJAF) has one Blanket Order Training Case valued at $474,830. Under this case an F-5 MTT is assisting Jordan in improving pilot production capability. Additionally, this blanket order case has 13

trainees in CONUS with five attending Air Command and Staff College. Another F-5 MTT is planned for Feb 83. The 82 IMET program has 13 trainees in CONUS with the majority enrolled in flying training. (The 83 IMET program has 20% trainees scheduled with 24 already in the CONUS at present.)

Iran (U)

(U) As of 31 Dec 82, the status of the Iranian FMS program was as follows:

Total Cases:	72
Value:	$2.8B

(U) Actions have been continued to manage the termination of the major weapon system programs, to reduce the total obligation authority of Iranian FMS, and to control Iranian Trust fund disbursements/reimbursements. Actions were also continued to manage storage of munitions, sensitive materiel, spares, support equipment and repairables in holding accounts, and to monitor the complete financial status of all open/active Iranian FMS cases.

United Arab Emirates (UAE) (U)

General (U)

The UAE has indicated strong interest in the purchase of 20-24 A-10As with the Night Enhancement Package (NEP) undergoing testing at Edwards AFB, CA. USAF's position to date is that this NEP is not releasable. It appears that

UAE's signing of a contract for the French Mirage 2000 is imminent, due to the reluctance of the US to release an advanced fighter to UAE.

Training (U)

(U) The UAE Air Force (UAEAF) currently has three Student Pilot Training cases valued at $[illegible]. The GAO is reducing the value of their training cases to $37.9M due to a shortfall in qualified personnel. Presently, the UAE has 67 trainees in CONUS training. Twenty-six of these trainees are attending Central Texas College in preparation for technical training. Sixteen are attending flying training (six in UPT and ten in UNT).

Bahrain (U)

The PEACE SHARK II LOA (FMS Case BA-D-SCA) for four F-5Gs and two F-5Fs was not offered to Bahrain due to a Bahrain Defense Forces (BDF) request for a release determination on sale of the F-16. The State Department is currently reviewing this request within the context of an overall policy decision on release of advanced fighters to Persian Gulf countries.

GENERAL (U)

(C) Foreign Military Sales (FMS) for countries in the Asia Division have seen a continued increase in the number of requests and value of cases, particularly for aircraft weapon systems. Indonesia requested Planning and Availability (P&A) data for 24 F-5E/F's and 20 F-16A/B aircraft. Japan signed a Letter of Offer and Acceptance (LOA) for two C-130H aircraft. Korea coproduced the first two of a planned 68 F-5E/F's and signed an LOA for 36 F-16C/D aircraft. Malaysia is scheduled to receive two RF-5E aircraft in the fourth quarter of 1983 under the PEACE SPRINGX III Program. The Pakistan PEACE GATE program for 40 F-16 aircraft valued over $1.1 billion is proceeding on schedule with the first six aircraft to be delivered in January 1981. The Philippine Air Force (PAF) requested Planning and Review (P&R) data for 18 F-16/79s and 18 F-70s. Taiwan signed LOAs for 66 F/TF-104G aircraft, and 60 additional, coproduced F-5E/F aircraft.

(C) The Asian countries listed below have no major Security Assistance programs. The following recaps active FMS cases for these countries:

Asian Division (U)

Indonesia (U)

Indonesia's total Foreign Military Sales (FMS) program amounts to $136.6 million with 48 active cases and an undelivered value of $43.5 million.[7] P&R data for 20 F-16/79 aircraft was provided to Indonesia in July 1982. Indonesia requested P&R data for 20 F-16s in March 1982, however, State has not yet approved release of P&R data on the F-16As.[3]

Japan (U)

Japan ended the period with an FMS program valued at $539.1 million with 130 active cases and an undelivered value of $346.0 million.[4] To date, eight F-15C/D type aircraft have been delivered under the PEACE EAGLE (100 F-15s) program. In November, the Government of Japan requested the F-15 Memorandum of Understanding (MOU) be revised to include an additional 55 F-15C/D aircraft with scheduled delivery between FY87 and FY93. On 6 August 1982, the Japan Air Self Defense Force (JASDF) signed an LOA for two C-130H aircraft scheduled for delivery October 1984.[5] An LOA for C-130H aircrew and technician training ($2.6M) was signed on 28 October 1982.[6] Program Reviews for the F-15 and C-130 were conducted in Tokyo during July 1982 and November 1982, respectively. P&R data was provided for both two and three F-15Os, and two C-130Hs in July 1982 with a scheduled delivery date in FY87.

Korea (U)

(S) The Republic of Korea Air Force (ROKAF) FMS program continued to be the largest in the Asia-Pacific Region totaling $2.39 billion with 282 active cases and an undelivered value of $1.41 billion.[7] The 1982 Security Assistance Review was held in Seoul in September. The F-5 coproduction program for 68 aircraft produced the first two F-5Es. Korean President Chun Doo Hwan and U.S. Ambassador Richard Walker were present for the formal roll-out ceremony on 9 September making it a major Korean event. The coproduction mix has been changed from 36 to 34 F-5Es and from 32 to 28 F-5Fs. An EOA for six F-4D attrition aircraft valued at $16.8 million was signed in November. The ROKAF has requested the aircraft be used in a fall 1983 RED FLAG exercise prior to delivery to Korea.[8] A MOU was signed in November 1982 for joint use of an F-4E simulator.[9] The ROKAF portion of the operational and maintenance costs will be managed via an FMS case. The PEACE ACE Joint One-Air Combat Maneuvering Instrumentation (ACMI) range became operational in December. The PEACE PRIDE program (36 F-16's) is scheduled to begin delivery in 1986; ROKAF will receive the advance F-16C and D models.[10]

Malaysia (U)

Malaysia's FMS program totaled $124.6 million with 50 active cases and an undelivered value of $47.2 million.[11] The PEACE STRIKE Mid-Term Review was held at Kelly AFB in October.

The PEACE STRIKE III program (two RF-5E aircraft) is proceeding on schedule with deliveries scheduled in the fourth quarter 1983. Northrop Corporation hosted the RF-5E unveiling ceremony on 3 November 1982 and the first RF-5E test flight was conducted on 15 December 1982. The Royal Malaysian Air Force (RMAF) did not accept an LOA for 14 F-5E and two F-5F aircraft due to funding constraints.[12]

Pakistan (U)

(U) Pakistan remains a major FMS participant with a total value of $1.27 billion with 86 active cases and an undelivered value of $1.16 billion.[13] The PEACE GATE program (40 F-16s) in the primary U.S. Air Force program for the Pakistan Air Force (PAF). The two PEACE GATE LOAs together total over $1.1 billion.[14] The 40 F-16 aircraft to be delivered under this program represent a major step for the PAF in the upgrade of their air defense capability. The first six F-16s are scheduled for delivery in January 1983, 13 months after LOA signature.

Philippines (U)

(U) The Philippine FMS program totaled $43.5 million with 59 active cases and an undelivered value of $71.4 million.[15] The program supports aircraft of U.S. origin through the Cooperative Logistics Supply Support Arrangement (CLSSA),

open end, and similar type FMS cases. Commando Pada, a radar rehabilitation project for height finder and search radars at three locations, was completed in August 1982. The Philippine Air Force is currently negotiating with Northrop for a direct commercial sale of 15 F-5Es and three F-5Fs. PSR data for 18 F-16/79s and 18 F-20s is currently being processed.[16]

Singapore (U)

(U) Singapore has a total FMS program valued at $211.1 million with 71 active cases and an undelivered value of $62.7 million.[17] The PEACE STARFIRE (200 AGM-65B Maverick Missiles and 600 Laser Guided Bombs) Program Review was held in June 1982 at Kelly AFB. PEACE STARFIRE deliveries began in August 1982 and will continue through 1983. Singapore requested an additional 150 GBU-16 and 26 Maverick Missiles.[18] The Republic of Singapore Air Force (RSAF) accepted an LOA to participate in the RSAF FLAG 83-2 (Jan 83).[19] The RSAF flew approximately 40 work-up sorties during December 1982. During the exercise beginning 10 January 1983, the RSAF will fly air-to-air and air-to-ground missions using three commercially procured F-5Es and one USAF F-5. RSAF will also fly approximately ten re-supply missions in their C-130s. A SIGAR Mobile Training Team was sent to Singapore in December 1982.[20]

Thailand (U)

The total FMS program for the Royal Thai Air Force (RTAF) was valued at $524.2 million with 306 active cases and an undelivered value of $182.0 million.[21] Deliveries for a total of [illegible] gun pods and associated support are scheduled to begin in September 1983 at a rate of two per month.[22] The RTAF is participating in COPE THUNDER 83-5 exercise (January 1983) at Clark AB, Philippines. This will be their second participation in COPE THUNDER. The PEACE PRINCE III (four C-130H-30 aircraft) delivery is scheduled for May 1983.[23] Crown Prince Vajiralongkorn completed English Language and Physiological Training on 3 November 1982 and entered F-5 Conversion Training on 27 December 1982 with a projected completion date of 6 April 1983.

Taiwan (U)

Taiwan ended the period with a total FMS value of $1.49 billion with 145 active cases and an undelivered value of $717.7 million.[24] An LOA was signed for a follow-on purchase of 40 F-5E/F aircraft.[25] This is a continuation of the PEACE TIGER capreplacement program. Three LOAs for 66 F/TF-104G aircraft and one LOA for conversion of 37 F/TF-104G ejection seats were accepted by Taiwan.[26]

POLICY AND MANAGEMENT DIVISION

Air Force Publications For Foreign Military Sales (FMS) Purchasers (U)

(U) Detailed procedures for the acquisition, implementation and management of follow-on publications and forms provided to security assistance purchasers under the FMS program were published in the AFM Volume IX, Chapter 5, on 11 October 1982. This new directive, for the first time, contains procedures for the automatic distribution of standard publications for FMS purchasers. In addition, Attachment 1 lists the categories and types of publications that require a separate DD Form 1513. The focal points and supply sources are also listed. Attachment 2 is a ready reference information matrix that tells FMS purchasers where and how to submit requests for each category and type of publication. It also informs the FMS purchaser of the sources of supply and lists the types of publications that are authorized for automatic distribution to FMS purchasers.

Movement of Cartridge Actuated Devices, Devices and Propellant Actuated Devices (CAD/PAD) items (Seat and Canopy Ejection Devices, Engine Starter Cartridges, and Catapults) (U)

(U) FMS purchasers have experienced difficulty arranging transportation of CAD/PAD items to the overseas destination, because of the low weight and volume and the explosive classification of CAD/PAD shipments. At AF/PRIM request, DSAA approved the shipment of CAD/PAD items in the Defense

UNCLASSIFIED

Date: Oct 10, 2018

Transportation System (DTS) under the following conditions:

a. (U) The FMS purchaser is unable to arrange timely transportation and requests DTS assistance by Military Airlift Command (MAC).

b. (U) There is regularly scheduled MAC airlift to the country requesting the service.

When there is no scheduled MAC airlift, the request for the use of DTS will be referred to AF/PRIM for resolution and determination by OSAA on the extent of MAC airlift that may be used. Approval is dependent upon the requesting country's ability to move the items to final destination from the MAC airlift termination discharge point.

Processing Discrepancy Reports
Against FMS Components (U)

(U) The Report of Discrepancy (ROD) Improvement/Surveillance Program (RISP) was initiated by the Defense Logistics Standard System Office in December 1981 to study and determine compliance with and adequacy of existing procedures, the need for policy and procedural changes and the feasibility of automated procedures. The RISP study is being performed by representatives from each of the Military Services and from DLA and GSA. AFSC TIC/DOCS, the Air Force FMS ROD International Logistics Control Office (ILCO) is providing the primary Air Force member to the RISP for FMS

Page determined to be Unclassified
Reviewed Air Force Declassification Office
IAW EO 13526, Section 3.5
Date: Oct 16, 2018

and AF/PRIM provides the alternate member. The surveillance phase of the RISP was completed in November 1982. The improvement phase of the RISP is to start at a meeting to be held at New Cumberland Army Depot, PA, 25 - 28 January 1983. AF/PRIM plans to participate in the improvement phase of the RISP to the maximum extent possible.

Transportation of FMS Materiel Procured from Foreign Vendors (Excluding Canadian Vendors) (U)

(U) The traditional FMS transportation procedures that apply to CONUS outbound shipments are generally not appropriate for movement of FMS materiel from foreign vendors. Except for Canadian procurement, the following procedures were established for FMS materiel procured from foreign sources. The procedures were effective 29 September 1982 and are to be used on all new contracts for ASLD managed cases and Modifications/Reversal Shipping Instructions (MODs/ADIs) to existing contracts in support of FMS requirements being procured from a foreign vendor under Delivery Term Code "4" conditions (FOB origin from the foreign vendor).

a. (U) Shipping instructions will contain the following phrase for all FMS line items: SHIP TO: When materiel is ready for shipment, contact the cognizant transportation officer for shipping address. (Materiel on this contract line is in support of Foreign Military Sales and is provided

Page determined to be Unclassified
Reviewed Air Force Declassification Office
IAW EO 13526, Section 3.5
Date: Oct 16, 2018

on the basis of Delivery at Origin. A designated country representative will receive materiel and arrange all movement and export).

b. (U) A copy of all contracts with foreign vendors, except Canadian, in support of FMS will be forwarded to AFLC/LOSPI.

c. (U) The AFLC/LOSPI will notify the proper International Logistics Center (ILC) country/case manager of the contract actions and request they notify the appropriate FMS country representatives.

d. (U) The ILC will advise the purchasing country embassy or representative of the source of supply for their materiel and request they take the following actions.

(1) (U) Obtain the necessary export license from the country of origin and advise the ILC that the license has been acquired.

(2) (U) Identify the Point of Contact (POC) in the country of origin who will make all arrangements for receipt and onward movement of the materiel and advise the ILC of this arrangement. Upon receipt of the confirmation that an export license has been obtained and the POC named, the ILC will advise AFLC/LOSPI.

e. (U) AFLC/LOSPI will, through the procurement traffic office, forward this information to the cognizant transportation office with instructions that when they are notified of materiel availability, the FMS country designated

Page determined to be Unclassified
Reviewed Air Force Declassification Office
IAW EO 13526, Section 3.5
Date: Oct 16, 2018

FMC will be notified to make necessary arrangements for movement from origin.

(U) Above procedures are to be published in the next revision to APR 75-43.

Temporary Duty (TDY) Financed by Security Assistance Funds (U)

(S) The following exception to the General Guidelines for TDY travel financed by security assistance funds became effective 5 December 1980.4 In those instances where (a) the travel is being charged directly to a specific FMS case and (b) the case provides for the utilization of a designated air carrier whenever possible and authorizes a class of service other than economy for the FMS customer has dictated those travel arrangements in a separate writer document such as a memorandum of agreement, etc.), the military or civilian traveler is expected to comply with the contractual arrangement. Appropriate changes to APR 10-7 and APR 400-3 have been prepared by AF/PRIM for publication.

FMS Purchaser Requisitioning of Classified Items (U)

(U) At APLC/MIMF request, AF/PRIM approved FMS purchaser requisitioning of classified items for FMSO II cases and Blanket Order cases for spare parts under the following conditions:5

Page determined to be Unclassified
Reviewed by Air Force Declassification Office
IAW EO 13526, Section 3.5
Date: Oct 16, 2018

a. (U) The DD Form 1513 contains a separate subline for the classified materiel when required.

b. (U) The case managers determine the delivery conditions for classified materiel from the purchaser at the time the LOA is negotiated. (A separate subline for classified materiel is not necessary when the purchaser is freight forwarder).

c. (U) If the purchaser prefers to move classified materiel from a DOD controlled CONUS port of exit by his own aircraft or vessel, the classified materiel will be assigned Delivery Term Code [illegible] 8. A separate subline is required.

d. (U) If the purchaser does not have a cleared freight forwarder and is unable to arrange transoceanic transportation from a DOD controlled port of exit by his own aircraft or vessel, the classified materiel will be assigned DTC 7. The above procedures are to be published in APR 75-45 and APR 67-1.

APR 400-3, Foreign Military Sales (U)

(U) Change 1 to APR 400-3 was submitted to publishing on [illegible] December 1982. Estimated distribution date is 1 April 1983.

Overseas Security Assistance Management Organizations (U)

(U) The security assistance administration operations continued to be conducted under a Continuing Resolution

Date: Oct 16, 2018

Authority [CRA]. Those organizations engaged in administration, management and supply operations, normally financed by the Military Assistance Program (MAP) appropriation, and the Panama Canal Military Schools (PCCMS) financed by the International Military Education and Training (IMET) appropriation, were authorized to incur obligations for essential operating expenses at an annual rate that did not exceed the FY 82 level of funding. This directive[6] will remain in force until expiration of CRA or until issuance of further guidance from SOMA.

(9) The method of financing Military Assistance Advisory Group (MAAG) administrative expenses was changed beginning FY 83. Heretofore, these expenses were initially financed from the MAP appropriation, with subsequent reimbursement from FMS administrative funds for expenses related to the FMS program. Commencing in FY 83, all MAAG administrative expenses, both FMS and Grant Aid related were initially financed by FMS Administrative Funds, with a later reimbursement from the MAP appropriation for Grant Aid related expenses. Under the change, the FMS account became the carrier financing account in lieu of the MAP account.

(9) An exception to policy request was made to AF/MPCH regarding the provision of Officer Efficiency Report (OER) data to this Headquarters pertaining to nominees for MAAG positions. While OER documents are privileged information, the Air Staff required this information to enable a total review of each nominee to enable identification of an

individual with optimum qualifications. AF/MPCR has now made the appropriate change to AF/MPCR DJ 36-20 to grant this exception to policy.7

(U) To accomplish effective supervision and coordination of U.S. military security assistance activities, Department of Defense personnel are required in most foreign countries. Proposals for the FY 1983 security assistance program included separate organizations dedicated to the security assistance mission in 29 countries. In 36 other countries, administration of the security assistance program was managed by the Defense Attache Office, (DAO) and/or the U.S. Embassy. As of 10 October 1982, the U.S. Defense Liaison Group in Indonesia reduced the number of military personnel from 27 to 15 and responsibility was transferred to the Military Attache Office, making a current total of 37 DAO security assistance activities.

IAW EO 13526, Section 3.5
Date: Oct 16, 2014

The transfer of security assistance functions to CINCLANT is a newly assigned mission directed by the Secretary of Defense and for which CINCLANT requested eight additional billets. Five of the eight additional billets were approved for inclusion in the Joint Manpower Program (JMP) for Headquarters, LANTCOM to support this new function.10 No new USAF billets were involved.

(U) The President approved the activation of a new unified command to be known as U.S. Central Command (USCENTCOM). The establishment of USCENTCOM will be effective 1 January 1983. It was originally the Rapid Deployment Joint Task Force with headquarters at MacDill AFB, FL. Area of responsibility will include 19 countries. The security assistance function is scheduled to be assumed on 1 October 1983. Until then, the function will continue to be the responsibility of USCINCEUR and CINCPAC, as currently assigned.

(U) Nominees to Security Assistance Organizations (SAOs), beginning FY 83, were all scheduled for the Dynamics of International Terrorism (DIT) course, USAF Special Operations School, Hurlburt Field, FL. Previously, only nominees to SAOs in selected countries attended the school. Attendance at the school is 70% USAF with the remaining quota assigned to the other Services. The Air Force recognized the need to train SAO personnel in response to worldwide terrorist threats, which significantly increased in attacks on US military personnel and resources.

Foreign Military Sales (FMS) Manpower (U)

(U) USAF security assistance was supported by about 8,550 equivalent manyears of effort during FY 82.11 Of these, about 40 were dedicated to the management and administration of the Military Assistance Program, 160 were assigned to MAAGs or similar activities, and about 8,650 to FMS management. TAC was the largest user of FMS military manpower with about 1,300 manyears, while AFLC was the greatest user of civilian FMS manpower with about 4,000 manyears. During FY 82, about 4,750 manyears of these personnel on FMS represented full-time effort and about 3,900 manyears were part-time effort.

USAF International Program (IP) (U)

(U) Expenditures for FY 82/3 were $239,721.00 and $291,564.00 for FY 82/4. Total expenditures for the International Program for FY 82 total approximately $1.1 million. This is an update of the semiannual history for the period 1 January - 30 June 1982.

(U) The Washington DC IP tour for this reporting period consisted of 19 visits to Washington, DC involving 41 countries with 304 international military students, 16 dependents (own expense), and 29 USAF escort officers. This is an update for the period 1 January - 30 June 1982.

(S) A Foreign Training Officer Workshop was conducted during the period 25 - 28 October 1981 at Maxwell AFB, AL. Approximately 90 persons participated in the workshop which was conducted in a seminar format. The seminars covered policy, administration, and the Informational Program. The participants attended one session of each seminar with briefings, and question and answer periods being very productive. Forty-one Foreign Training Officers were present with representatives from the Air Force, Army, Navy, and Marine Corps. Also represented were WASHINGTON, CINCPAC, USAFE, WHINSCEMFA, CISAN, DLSIAC, AFSC, ATC, MAC, SAC, and TAC. Lieutenant General Charles B. Cleveland, Commander, Air University delivered the keynote speech.

Orientation Training Course (OTTs) (S)

(S) No OTTs were conducted during this period.

FY 82/83 Security Assistance Legislation (S)

(S) FY 82 Supplemental Appropriations Bill:

With the enactment of this bill (Public Law 97-257) several additional appropriations were made available for the FY 82 security assistance program. Following is a brief summary:

MAP: $2M available for obligation until 30 September 1982.

$25M reprogrammed from 82 funds.

IMET: $3.512M was made available.

FMS Credits: $50M in direct credits (forgiven) for Sudan.

Special Defense Acquisition Fund: Provided $125M in obligational authority.

(U) FY 83 Continuing Resolution Authority (CRA):

Under the first CRA, Under Secretary of State Schneider approved MAP and FMS credit allocations as follows:

Country	MAP	($ Millions) FMSCR
Pakistan		150
Lebanon		10
Turkey		150
Somalia	10	10
Tunisia		35
Morocco		20
El Salvador	8.5	16.5
Honduras	1.0	9.0

(U) The Congress completed action on the second CRA (House Joint Resolution 631), on 19 December 1982. House Joint Resolution 631, taking further continuing appropriations until 30 September 1983, funds security assistance programs at the following levels:

	President's FY 83 Request	2nd CR
FMSCR (guaranteed)	4,323.5	3,638.0 14/
FMSCR (direct/forgiven)	950.0 12/	1,175.0 15/
Grant (MAP)	557.0 13/	280.0 16/
Training (IMET)	53.7	45.0

Additionally, the Congress agreed to provide $125M obligational authority for the Special Defense Acquisition Fund for FY 83.

(U) ~~Legislative Initiatives~~: Numerous legislative initiatives were introduced with FY 83 authorization legislation. Since these authorization bills were not passed, these new initiatives will be introduced with FY 84 security assistance legislation.

Revision to Air Force FMS Case Closure Procedures (U)

(U) On 20 July 1982, AF/PRIM issued revised instructions[17] for preparation of Certificates of Closure and Statements for Certificates of Closure in Air Force FMS cases. The revisions were required to comply with DOD 7290.3M, Foreign Military Sales Financial Management Manual, and to improve the FMS case/line closure process.

Enhancement to FMS Payment Schedule Computer Program (U)

(U) AFSDC/GRD made additional improvements to the AF/PRIM FMS payment schedule computer program. Memory capacity was increased from 50 to 250 individual schedules, a Draft Users Manual was developed, and the program was enhanced to perform additional calculations upon user request. Details on operation of the program were provided to AFLC ILC for their review,[18] and a copy of the program was provided to Control Data Corporation to adapt the program for access via Air Force Customer Order Control System equipment.

Payment Schedules for FMS Training Cases (U)

(U) On 26 August 1982, AF/PRIM requested PMTAC/PAM to provide a proposed payment schedule, along with other computer-generated data now provided to AF/PRI country managers, for EDA preparation purposes.19 Generation of a proposed payment schedule by the PMTAC computer will expedite payment schedule preparation by AF/PRIM and eliminate duplicative efforts in many instances. No formal response had been received at the end of the reporting period; however, PMTAC/PAM representatives have informed AF/PRIM that development of the program should be completed early in 1983.

Validation of Foreign Military Sales (FMS) Payment Profiles (U)

(U) In compliance with SAHM direction that cost curves used in estimating FMS payment schedules for major weapons systems be reviewed periodically for validity, AF/PRI requested AF/ACM review the curves used in the AF/PRIM computerized payment schedular program.20 AF/ACM responded that an in-depth study would be required and that initial results would be available in February 1983.21

Logistics/Financial Data Reconciliation (U)

(U) During the previous reporting period, AFLC began a series of meetings to attempt to resolve financial/logistics out-of-balance conditions on FMS cases managed by AFLC.

Page determined to be Unclassified
Reviewed Air Force Declassification Office
IAW EO 13526, Section 3.5
Date: Oct 16, 2018

this effort stemmed from a 22 April 1982 AF/PRI letter outlining the problems within AFLC. However, little substantive improvement was made, and it became apparent that irreconcilable PMS data plagued other PMS implementing commands as well. AF/PRI outlined the broader problems in a 7 October 1982 letter to AF/ACM and AFAFC/CC,22 and requested [illegible] improvement efforts to meet current PMS financial management requirements.

Delivery Reporting Discrepancies (U)

(U) In a 7 October 1982 letter to AFAFC/XSMI, AF/PRIM forwarded a list of 211 Air Force PMS cases where expenditures reported to SAAC exceeded USAF obligations in the Air Force Customer Order System.23 AF/PRIM requested AFAFC/XSMI, as the USAF OPR for PMS delivery reporting, to research these cases in order to develop corrective action. A 17 December 1982 memorandum from AF/ACF advised AF/PRI that a review of 1982 fiscal year-end data revealed 1,022 cases with $ discrepancies (rather than 211) with eight cases representing 55 percent of the dollar discrepancy. In six of the eight cases, the discrepancies were due to delivery reporting errors by ASD/ACB (5) and AFLC (1); AF/ACF has directed corrective action. In the other two cases, discrepancies were caused by a deficiency in the Air Force Customer Control System (AFCCCS); AF/ACF has requested AF/ACMS to correct AFCCCS programming. AF/ACF has stratified

Page determined to be Unclassified
Reviewed Air Force Declassification Office

Date: Oct 16, 2018

the remainder of the 1,022 cases by dollar value and will research them in the same manner as above.24

Professional Military Education A.F. Force (U)

(U) Thirty-four International students are attending the 1982-1983 session of the Air War College class under security assistance authority. These students represent 26 different countries.25

USAF Training Under the FY 82 International Military Education and Training Program (IMETP)(U)

(U) The FY 82 Air Force IMETP was valued at $14.35M as of 28 September 1982.26 Training will be provided to approximately 893 students from 15 countries.

Joint Security Assistance (JSAT) Regulation (U)

(U) The JSAT regulation will replace AFR 50-29, Education and Training of Foreign Military Personnel, and the Departments of Army and Navy regulations pertaining to security assistance training. The final draft of the JSAT is being reviewed by the Defense Security Assistance Agency. The JSAT is a Joint Army, Navy and Air Force project; the Army is the office of primary responsibility. Publication is expected in fiscal year 84.

A-10 (U)

(U) The United Arab Emirates (UAE) expressed an interest in the A-10 aircraft, and requested Planning and Review (P&R) data on a stripped down basic A-10 and the incremental costs for subsystems which would provide a night-fighting capability. Fairchild Republic has developed a prototype of a night/weather Maverick (N/AW) A-10, which is of interest to the Emirts. However, the subsystem comprising the N/AW configuration is still experimental, and the night fighting capability has not been validated by the USAF. The Emirts were granted approval to test fly the N/AW A-10 at Edwards Air Force Base in Jan 83, although no commitments were made to release or sell this configuration to the UAE. Meanwhile, the USAF is seeking alternative N/AW subsystem which could be released. The UAE has stipulated that the night fighting capability is a key to their interest in purchasing the A-10.

F-16 Aircraft Programs (U)

(U) The past six months have been very active for F-16 Foreign Military Sales (FMS). Venezuela and Pakistan programs are fully defined with Pakistan to receive six aircraft in Jan 83.

(U) The Greek and Turkish new fighter aircraft selection competitors continue. Greece still has a requirement for 60 or 100 aircraft with option for 30 additional aircraft; however, the Turks have reduced their requirement from 291 to 160 aircraft. Greece and Turkey are extremely interested in the

Coproduction and offset aspects of the aircraft acquisition. Additionally, base rights negotiations are underway in Greece and are expected to bear on their program. The Israeli follow-on buy of 75 aircraft is still awaiting final administration approval.

PSR data has been provided to Jordan. Other countries who have expressed interest in the F-16s are Thailand, Singapore, Indonesia, Malaysia, and the Philippines. A final determination has not been made on providing PSR data to STAB countries for F-16A/B aircraft.

Under Deputy Secretary of Defense direction, DSAP and the Joint Chiefs of Staff (JCS) arrived at an F-14 configuration for the Gulf Cooperation Council (GCC) states of UAE, Bahrain, Oman, Qatar, Saudi Arabia, and Kuwait.

NATO Airborne Early Warning And Control (AEW&C) Program (U)

(U) AF/PRIF continued to operate as a focal point for Air Staff acquisition and initial operations and support matters related to the NATO AEW&C Program. In addition, AF/PRIP provides the US Government representative to the NATO AEW&C Program Legal, Contracts, and Finance (LCF) Committee of the Board of Directors (BOD).

(U) Installation, checkout, and production acceptance testing for NATO E-3A production aircraft continued at the Dornier GMBH facilities in Oberpfaffenhoen, Germany. Aircraft deliveries to the NATO E-3A Main Operating Base (MOB) (Geilenkirchen, Germany) were ahead of schedule. N-3 was delivered in Aug 82 and N-4 in Nov 82.

NATO AEW&C Program Issues (U)

(U) Depot Level Maintenance (DLM) - The DLM Request For Proposal (RFP) was released on 30 Jul 82 to bidders that had been nominated by the nations. RFP responses were originally scheduled for Jan 83 but were extended to Sep 83 to permit the inclusion of additional tasks in the Statement of Work and DLOs to be submitted on the expanded scope. Industrial Benefits, the share of business a nation will receive in the NATO E-3A DLM Program, was an issue. The DLM work content was less than originally estimated due to better than that projected E-3A reliability.

(U) NATO AEW&C Ground Environment Integration System (NAEGIS) Phase I System verification at Hughes Aircraft Systems International (HASI) was successfully completed and on-site verification in Europe (Phase II) began in Jul 82. The Phase III, production contract was signed in Aug.

(U) Program Cost - Boeing declared a $15 Million (Then Year) underrun on the E-3A development, test, and evaluation contract.

(U) NATO AEW&C Operations and Support (O&S) Memorandum of Understanding (MOU). Nations have still not agreed to the terms of the claims provision of the MOU. A proposal was prepared by some nations that would place a low limit on the liability of the Antrim in which an aircraft accident occurred. The US is staffing a counter proposal.

(U) Phase-out of the NATO AEW&C Program Management Agency (NAMMA) - Planning has been initiated to phase-out NAMMA and transfer functions to other NATO organizations once the

acquisition program [illegible]. This is supposed to take place by Oct 85. There are indications, however, that the ground environment portion of the work may not be complete at that time and numerous residual tasks may require the organization to be maintained for at least one additional year. This would result in some added administrative costs.

Security Assistance Five-Year Plan (U)

(U) During the past six months, Lt Gen Hans H. Driessnack, AF/XO, tasked AF/XD and AF/PR to develop a milestone chart for updating the five-year Plan and to expand the plan to include regional assessments and more data on conventional munitions.

(U) AF/XO has prepared draft regional assessments on the Plan dated 14 May 82. AF/PR and AF/XO proposed and Lt Gen Driessnack approved, a mid-Feb 83 update of the Plan. The staff also proposed that 97 countries will be included in the next edition of the Plan as opposed to 25 in the first draft.

(U) After Mr. Edward C. Aldridge, SAF/US, approved the draft, Maj Gen Rupert J. Sechler briefed Gen James P. Mullins, AFLC/CC; Lt Gen Philip C. Gast, Director, Defense Security Assistance Agency (DSAA), members of OSD, and Mr. William Schneider, Jr., Under Secretary of State for Security Assistance, Science and Technology. As a consequence of the briefing to AFLC/CC, he tasked his people to include a logistic assessment of each country in the plan. The assessment includes describing the logistic philosophy of the country, as well as the communications, the supplies, transportation warehouse/storage, and

maintenance systems. In addition, the assessment evaluates the country's logistic system and recommends improvements.

(U) Air Gen Carr was briefed. He agreed the Plan was a good idea and he and his staff would support our efforts to make a Tri-Service Plan.

(U) Mr. Schneider believes the Security Assistance Plan is a good idea and requested Under Secretary of Defense for Policy, Mr. Fred C. Ikle, to include a directive in the Defense Guidance calling for a Security Assistance Plan.

(U) The Air Force is in the process of preparing the Feb edition of the Plan. HQ AFLC has submitted to AF/PRI their first draft of the logistic assessment for the 14 May 83 Plan. DSAA has convened a working group to determine the content of a Tri-Service Plan.

ALQ-131 Electronic Countermeasures (ECM) Pod Programs (U)

(U) The Royal Netherlands Air Force (RNLAF) has signed a Letter of Offer and Acceptance (LOA) for another 13 ALQ-131 pods. RNLAF is now on contract for 26 pods. The Egyptian Air Force (EAF) has signed an LOA for 40 ECM pods with initial delivery in early 84. Saudi Arabia has requested a briefing on the ALQ-131 for possible use on their F-15 aircraft. The USAF is now staffing an Exception to National Disclosure Policy (NDP) for Saudi Arabia.

(U) Also, noteworthy is the agreement by the Air Staff on the FMS version of the ALQ-131 for Egypt and Pakistan.

(U) Potential ALQ-131 purchasers in 83 will be Japan (14 pods) and Norway (15-30 pods).

AIM-9P Sidewinder Missiles (U)

(U) The production run of AIM-9P missiles has terminated. The Air Staff has decided to satisfy near term FMS requirements for AIM-9P missiles by Replacement-In-Kind (RIK) sale from inventory. Current stock quantities of up to 1900 AIM-9Ps are available for sale/replacement. The Jordanian Air Force and Turkish Air Force have received LOAs for AIM-9P RIK. The Venezuelan Air Force has recently been briefed on the AIM-9P-3 missile.

F-16 Multinational Fighter Program (MNFP) (U)

(U) AF/PRIP attended F-16 MNFP Steering Committee and Contracts and Financial Subcommittee meetings to represent FMS matters. Additional policy papers were prepared and staffed to finally resolve issues on interpretation of the scope of original European Participating Governments (EPG) F-16 system sales cases and to clarify the applicability of the current FMS Administrative Surcharge to follow-on purchases. In response to continuing EPG concerns, information was researched and presented to explain the Department of Defense stock fund surcharges and their effect on F-16 MNFP spares purchases. AF/PRIP assisted in finalizing cost sharing arrangements for common software programming support to the EPG and in developing programs for follow-on electronic warfare systems update support. AF/PRIP also monitored development of planning and policies for follow-on F-16 aircraft systems sales and supported the negotiation and staffing of terms for a follow-on purchase with coproduction/offset.

Special Defense Acquisition Fund (SDAF) (U)

(S) SDAF expenditure authority was provided for the first time in the Fiscal Year 82 Supplemental Appropriation, which was signed 10 Sep 82. A total of $125 Million for the Department of Defense was authorized with an obligation deadline of 30 Sep 82.[1] AF/PRIP supported the rapid staffing process required to finalize SDAF acquisition decisions and arranged for contracting actions to implement. DRAF was tasked to procure 120 AGM-65B Maverick missiles and two AN/TPS-70 radars with spares, communications, and shelters. AF/PRIP coordinated the flow of procurement authority from Defense Security Assistance Agency to Air Logistics Center contracting officers who achieved the required contract obligations totalling $19.7 Million before the deadline. Continuing coordination and communication was also provided to resolve interim program operating procedures pending formal publication of the Department of Defense guidance on the SDAF.

(U) AF/PRIP initiated planning for Fiscal Years 83 and 84 SDAF acquisition recommendations in the last quarter of the year. Inputs from AFSC and the Air Staff were collected. A proposal package with supporting data was compiled and distributed for final Air Staff coordination.

Intermediate Export Fighter (F-X) Program (U)

(U) The F-X Program is continuing based on the new foreign policy guidance provided by President Reagan. All the impacts to the F-X Program have been assessed, and even

DECLASSIFIED IN FULL

though PD-13 has been rescinded, the Defense Department direction of the implementation of the F-X Program has continued in full force.

(U) The F-5G program continued under the established milestones and the first aircraft flight was accomplished in Aug 82. Due to significant differences between the F-5E and the F-5G, Northrop Corporation requested that the Air Force redesignate the F-5G the F-20A. The Air Force evaluated this request and in Nov 82 formally designated the aircraft the F-20A. The initial sales of both F-X aircraft, the F-20A (formerly the F-5G) for Bahrain and the F-16/79 for Peru, were cancelled at the foreign governments' request. While there has been increased interest in both F-X aircraft, no firm sales requests are pending.

F/RF-5E/F Aircraft Programs (U)

(U) The first flight of the RF-5E was accomplished on 15 Dec 82. Development Test and Evaluation (DT&E) of the aircraft is continuing on schedule with estimated completion in Jul 83. Delivery of the first two aircraft to Malaysia is scheduled for Oct 83.

(U) Due to attrition and expiring service life, USAF's F-5 training capability has been shrinking. Tactical Air Command advised that by 1984 they would not be able to support all of the projected FMS training requirements. As all other USAF F-5 aircraft are committed, we requested recovery of asset use charge collections to replace two aircraft lost in

UNCLASSIFIED

an FMS training mishap in 82. We have also requested procurement of three F-5F aircraft in each of FY83 and FY84 through the SDAF. Results of these two efforts are pending.

NATO Airborne Early Warning (AEW) Training (U)

(U) All NATO AEW aircrew conversion training by the 552 AWACW has been completed. The NATO AEW Training Center at Tinker Air Force Base is now conducting all aircrew conversion training and a significant amount of the training for support personnel. Lead-in mission avionic training for NATO aircrews is still conducted by USAF in CONUS and will continue indefinitely.

(U) NATO has provided the final increment of initial cadre training requirements as known at this time. These courses will continue into 1985. Some discussion continues concerning additional areas which would ultimately be better trained in CONUS.

(U) As the rotation drop for initial cadre personnel approaches, new training requirements will be generated in those areas not provided by NATO AEW Training Center. These requirements are now being developed within NATO and will be discussed between USAF and NATO prior to final submission.

Date: Oct 16, 2018

General (U)

(U) The USAF Foreign Military Sales (FMS) program with Saudi Arabia consisted of 832 open cases valued at $13.6 Million as of 31 Dec 82.[1]

Air Defense Radars (PEACE PULSE) (Update) (U)

(U) The PEACE PULSE IV and V Letters of Offer and Acceptance (LOAs) for the sale of two TPS-43M radars, configured with the AN/TPS-70 Jammers, and associated support were accepted by the Saudi Arabian Government (SAG) on 14 Nov and 30 Oct 82, respectively. The LOAs were implemented by case directive on 17 Nov 82[2]. Projected factory delivery for these two radars is 26-30 months after contract award. The Royal Saudi Air Force (RSAF) submitted an early request for a one year extension of the Westinghouse in-Kingdom maintenance services contract consistent with expiration of the current contract in Apr 83.[3]

(U) U.S. Department of State authorization for the USAF to provide an LOA to the SAG for sale of an additional (seventh) TPS-43 radar and support was conveyed by the Department of Defense (DOD) on 7 Oct 82.[4] Additional refinements for this sale, PEACE PULSE VI, were identified at the PEACE PULSE Program Management Review (PMR) No. 4,

Page determined to be Unclassified

Date: Oct 16, 2018

Sale 5-2 June 82 to Riyadh, Saudi Arabia.[5] The LOA tender date is projected for Feb 83.

(U) Spares delivery was an item of RSAF concern at PEACE PULSE TWO No. 4. HQ USAF/PRIS directed that monthly status reporting of projected PEACE PULSE spares/support equipment deliveries be provided to the RSAF beginning 1 Feb 83.[6]

PEACE SHIELD (PSAF Command, Control, and Communications (C³) Project) (U)

(U) The PEACE SHIELD LOA was formally tendered on 8 Jul 82 with an initial expiration date of 20 Sep 82.[7] At RSAF request the expiration date was extended to 12 Feb 83 to afford the RSAF and SAG additional staffing time.[8] The impact of this delay on costs, projected delivery and construction is being evaluated. PEACE SHIELD, when implemented, will provide for: acquisition, installation and testing of RSAF C³ system Prime Mission Equipment (PME), High Frequency (HF) ground-to-air communications, ten Ground Entry Stations (GES) for Airborne Warning and Control System (AWACS) data interface, spares, training, increased C³ Technical Assistance Field Team (TAFT) personnel manning, in-country support, long range three dimensional radar; and technical facilities construction.

PEACE HAWK IV (Update) (U)

(U) Activities continue to complete deliveries and billings on all cases, however, there were 22 unshipped requisitions under munitions ~~subcase SP-D-SCX~~ at the end of Dec 82. Deliveries against this case may continue still into 1984 as a result of new ~~MDAP~~ requisitions submitted during the FY [illegible] 82.[9] [illegible] HAWK, a DD Form 1513-2 was countersigned on 5 Aug 82 to transfer excess PEACE HAWK IV funds ($2,564,658) to PEACE HAWK VII for other uses.[10]

PEACE HAWK V (Update) (U)

(U) Actions remaining on this program include final cost accounting, billing and case/program closures. At the request of Chief PEACE HAWK, excess funds in the PEACE HAWK V program ($2,029,920) were transferred to PEACE HAWK VII for other uses.[11]

PEACE HAWK VII Construction (U)

(U) The status of construction contracts which include PEACE HAWK (PH) VII projects is as follows:[12]

King Abdulaziz Air Base

Contract	Description	Status
K1	Perimeter Fence	Work stoppage at 88% complete due to inter-Saudi highway work.
C	Security Facilities, Escape/Evasion Compound, Rifle/Pistol Range	Contractor well behind schedule, only 37% complete.

Reviewed Air Force Declassification Office
IAW EO 13526, Section 3.5
Date: Oct 16, 2018

G	Security Facilities, Special Purpose Vehicle Facility	No actual construction reported.

King Fahad Air Base

C	Security Facilities, Fire Fighting Tng Area, Helicopter Sqdn Ops	Construction approximately 55% complete.
G	Security Facilities/ Rifle/Pistol Range	Construction approximately 17% complete.

King Khalid Air Base

IB	Perimeter Fenced/Patrol Road	Delayed by site dispute/ 27% complete.
C	Security Facilities, Fire Fighting Tng Area, Rifle/Pistol Range	Contractor well behind schedule. PB VII projects about 38% complete.
G	Security Facilites/ Sewage Treatment Plant	No construction reported to date.

King Faisal Air Base

C	Security Facilites	Contractor making minimum progress. PB VII projects about 51% complete.
G	Security Facilities	Construction approximately 24% complete.

PEACE HAWK VIII (S)

(U) PEACE HAWK VIII is a three year follow-on program to provide technical and personnel support for the RSAF PEACE HAWK program. The LOA was signed 24 Feb 82. Formal contract negotiations began at San Antonio Air Logistics Center (SA-ALC) Kelly AFB, San Antonio, Texas, on 22 Mar 82 and were concluded 20 Jul 82. The definitized contract was signed on 12 Aug 82 with final approval and distribution by HQ AFLC/PM 27 Aug 82.[13]

Page determined to be Unclassified
Reviewed by Air Force Declassification Office
IAW EO 13526, Section 3.5
Date: Oct 16, 2018

(S) The USAF Production Plan (PPP) scheduled 15 functions to be certified during the period Jul-Dec 82, however, 18 functions were actually certified during this period. This brings the total of functions certified to 335. A total of 351 functions require certification.[14]

PEACE HAWK IX (U)

(U) On 11 Aug 82, the RSAF requested that the 12 Aug 82 expiration date be extended, at no cost, to 10 Nov 82 to allow a complete review and study of PEACE HAWK IX program requirements. On 16 Aug 82, an interim extension was granted to 31 Aug 82. On 9 Sep 82 a new LOA, case identifier SR-D-SME, was tendered which granted the no-cost extension to 10 Nov 82 and incorporated RSAF selected options and changes. A USAFS/CV message, 170610Z Oct 82, stated that The Minister of Defense and Aviation (MODA) had requested a detailed breakdown of LOA costs and indicated that LOA processing would not proceed until satisfactory answers were received. On 5 Nov 82 HQ USAF/PRIS provided a detailed cost breakout and the rationale for the cost differences between the F-5 aircraft delivered in 1977 and the aircraft in LOA SR-D-SME, and granted a 45-day, no-cost extension of the expiration date to 25 Dec 82. A USAFS/CC 080830Z Dec 82 message transmitted an RSAF request for an additional 90-day extension to 25 Mar 83. HQ USAF/PRIS extended the PEACE HAWK IX LOA expiration date to 25 Mar 83 with resultant changes in cost and schedule.[15]

Country Standard Item Support (CSIS) (U)

(U) The RSAF tendered an LOA SR-D-UWL to the USAF in May 82 for nonstandard support of F-5, F-15 and TPS-43 weapons systems.[18] This LOA was finally accepted by the RSAF on Dec 82[17] following actions by the USAF to reduce the administrative charges from 5% to 2% on the first year of F-5 support.[18] This reduction was made under the premise that the first year of F-5 nonstandard support would be solesource from Northrop and not through AFLC item managers and thus not incur abnormal expenses. The second year of nonstandard F-5 support and all F-15 and TPS-43 nonstandard support will be through AFLC item managers and a 5% administrative charge will be made.[19] Cases SR-D-YCK and SR-D-GAF were extended to meet RSAF needs pending acceptance of case SR-D-QW.[20]

F-5 Technical Coordination Program (TCP) (U)

(U) The Technical Coordination Group (TCG) continued its work to solve the AN/APQ-159 Video Indicator problem, with efforts through Northrop and its subvendors producing improvements beyond the end of 1983.[21] Following Northrop cancellation of orders from Emerson and direct contracting with Conrac, AFLC ILC/SWF reminded Northrop that it must accept responsibility for lack of support for the AN/APQ-159 system and insure that alternate sources are available to provide timely support.[22] Northrop maintained that inaction by Emerson made the cancellation action necessary.[23]

Page determined to be Unclassified
Reviewed Air Force Declassification Office
IAW EO 13526, Section 3.5
Date: Oct 16, 2018

(U) Working with the TCG the RSAF developed and recommended a modification to the F-5 nose gear system to solve a dohine problem.[24] The modification was approved and kits will be procured for a mid-83 aircraft retrofit.[25]

(U) Four RSAF officers attended the 3rd Annual F-5 Technical Change Program Review [illegible] 26 Sep - 1 Oct 82.[26] Following the successful review, the TCG suggested a technical review in Saudi Arabia in early 1983.[27] At the end of the year TCG personnel were trying to get the RSAF to reconsider a decision that an early-1983 review was not necessary.[28]

PEACE SUN I (RSAF F-15 Aircraft Program) (U)

(U) The PEACE SUN Ferry Plan, F-15 aircraft to Saudi Arabia was developed by the 4565th Foreign Military Training Management Squadron. This organization was redesignated as the Tactical Air Command Security Assistance Office (TACSAO) to reflect Tactical Air Command's increased involvement in foreign military sales of advanced tactical aircraft.[29] Twenty-four aircraft (17 F-15Cs and 7 F-15Ds) were delivered to King AbdUlaziz and King Fahad Air Bases between 1 Jul and 31 Dec 82 (2 on 1 Aug, 1 on 11 Aug plus 3 each on 12 Sep, 18 Sep, 23 Oct, 6 Nov and 20 Nov.) The six training aircraft were delivered from Luke AFB on 28 Aug 82.[30]

(U) King Fahad Air Base was activated on 31 Jul 82.[31] Operational set up and check out of the second RSAF F-15 simulator at King Fahad Air Base was completed on

Page determined to be Unclassified
Reviewed Air Force Declassification Office
IAW EO 13526, Section 3.5
Date: Oct 15, 2018

15 Jul 82.[32] As of 15 Dec 82, approximately 14,271 requisitions had been processed against PEACE SUN I simulator spares SFT of which 13,854 or 97% had been shipped by sources of supply for aggregation at Goodyear. The above numbers include 990 or 100% of critical (bench stock) requisitions. Sources of supply have also shipped approximately 97% of the support equipment requisitions processed against PEACE SUN support equipment case SFD.

(U) Amendment 3 to the PEACE SUN I LOA was implemented on 15 Jul 82.[33] This Amendment provides 101 sets of conformal fuel tanks, 1177 AIM-9L missiles and related support.

(U) The first F-15 production dispersal kit containers arrived Dhahran, Saudi Arabia on 27 Jul 82. The International Logistics Center Project Officer and a Tactical Air Command team assisted the RSAF in building and installing a container control system. The initial F-15 dispersal kit build-up plan for subsequent kits was completed.[34]

(U) PEACE SUN Program Management Review No. 9, which was scheduled for 13-17 Sep 82, was cancelled by the RSAF. Existing PEACE SUN issues were resolved between RSAF and USAF representatives at HQ RSAF in Riyadh on 11-14 Sep 82.[35]

(U) Major Salal Mirza (RSAF/13th Squadron) flew the RSAF requested F-15 Tactical Electronics Warfare Systems (TEWS) confidence flight on 3 Sep 82. The TEWS flight was

Page determined to be Unclassified
Reviewed Air Force Declassification Office

Date Oct 16, 2018

flown in RSAF F-15C, Serial Number 80-0080, on the electronic warfare range at Eglin AFB, Florida, and lasted 1.5 hours. All signals used were from the RSAF threat list and the appropriate display was reviewed. No problems were encountered during any portion of the flight.[36] Results of the confidence flight were briefed to the RSAF in Riyadh, Saudi Arabia, on 2 Nov 82.[37]

PEACE SUN II (U)

(U) The PEACE SUN II program, case SR-D-YBM, was accepted by the SAC on 10 Feb 80 and was implemented to AFLC on 29 Feb 80. The program involves a major effort to provide facilities for activation of F-15 operations at King Abdulaziz (KKAB), King Fahad (KFAB) and King Khalid (KKAB) Air Bases. Construction involves modification of existing facilities plus erection of new buildings at each base.[38]

(U) The status of contracts awarded under the PEACE SUN II program at the end of Dec 82 was as follows:[39]

King Khalid Air Base

A-2	Staff Housing	Completed 11 Jun 81.
B	Priority 1 Facilities	Contractor behind schedule with 55% complete. Progress is slow.
C	Priority 2/3 Facilities	Contractor 29% complete and having management, labor and material problems.
D	Engine Test Stand (SUPP)	Contract was awarded on 24 Jul 82.
G	Mission Enhancement Facilities	Contract awarded 26 Mar 82. Minimum construction to date.

Summary

(U) At the end of Dec 82, the KAAB "B" contractor had completed most of the work on PEACE SUN II facilities. King Fahad Air Base "B" contract package was also essentially complete. Repair work was in progress on the exterior architectural concrete finishes which were poor quality. The King Khalid Air Base "B" contractor continued to experience problems with site productivity and material shortages resulting in schedule slippage. Preliminary contingency planning for joint occupancy was accomplished to

provide priority facilities for aircraft delivery in Jul 83. The "C" package contractor at King Fahad has completed 63% of his contract. In contrast, the "C" package contractors at KAAB and KKAB have completed only 40% and 29% of their contract requirements. At KKAB only one line item was projected for completion within the dates established in the Novation Agreement of 23 Jan 82. At KAAB the "C" package contractor was still hampered by a lack of manpower and materials. Minimum construction had occurred on the "G" contractor packages. Telephone installations were continuing at KAAB and KKAB as facilities became available with 45% and 23% completed respectively.[40]

PEACE SUN III (U)

(U) Chief PEACE SUN approved the move of Logistic Support Group (LSG) Headquarters activities from Al Khobar to Riyadh. The initial move increment was completed on 30 Nov 82. The remaining personnel will be relocated in the summer of 1983.[41] Chief PEACE SUN approved the transfer of $1.6M from the Contingency Ceng, SR-D-YDK, to the Contractor Technical Ceng, SR-D-YDB, for the maintenance of new PEACE SUN III General Purpose Vehicles for the period of 1 Dec 82 through 15 Feb 85.[42]

(U) The RSAF and USAF have an agreement for the delivery of F-15 aircraft to Saudi Arabia as they become available from production facilities. This will result in delivery of all 60 aircraft purchased prior to the activation of KKAB in Jul 83. Aircraft are being delivered

Date: Oct 16, 2018

to KAAB and KFDAB. A second part of the agreement was that contractor manpower for KKAB would not be expedited to support enhanced operations at KKAB.[43] The USAF and RSAF met in Dec 82 to combine the Nov 82 PEACE SUN III Program Description (PD) with the Statement of Work (SOW) for the contract with McDonnell Douglas Services, Inc. (MDS). The review resulted in a combined PD/SOW.[44] The RSAF rejected the $11M not-to-exceed proposal by MDS to put the Combat Readiness Plan (CRP) on contract and advised USAF they wanted to go back to the RFP. The USAF and RSAF met in Dec 82 and reached agreement on RFP wording.[45]

PEACE SUN IV (Update) (U)

(U) Of the 235 RSAF maintenance technicians programmed to receive F-15 C/D aircraft systems maintenance training in CONUS, 229 successfully completed the entire training program and have returned to Saudi Arabia, and six were eliminated from training for the following reasons: (1) one for academic difficulty; (2) two for medical reasons; (3) two for disciplinary reasons; and (4) one was self-eliminated. The total attrition rate for this portion of the PEACE SUN IV program was 2.6%.[46]

(U) Of the nine RSAF officers originally programmed to receive Field Training Detachment (FTD) and counterpart TAC F-15 training in aircraft maintenance skills, three completed their CONUS training. The remaining six officer training spaces were filled by non-commissioned officer

Date: Oct 18, 2018

(NCO) personnel. Of the six RSAF NCO student inputs, one munitions and one Avionics skill entry completed CONUS training. A total of four, two munitions and two Avionic skill student entries, are currently in CONUS training.[47]

PEACE SON V (U)

(U) The RSAF SON V LOA was amended to provide two F-15C attrition aircraft to be stored in CONUS and delivered to the RSAF to replace F-15 aircraft damaged beyond repair. The RSAF requested and the Secretary of Defense concurred with the purchase of one F-15C and one F-15D vice two F-15C attrition aircraft.[48] The F-15 System Program Office provided RSAF with direction to proceed on Contract Change Proposal 263 entitled, "USAF/PEACE SON Aircraft Conversion".[49]

PEACE SENTINEL (U)

(U) The USAF formally implemented the PEACE SENTINEL I LOA on 15 Jul 82 following RSAF acceptance on 30 Jun 82.[50] USAF activities subsequent to the implementation through the end of 1982 were associated with working out the myriad of details associated with the aircraft acquisition, development of the Concept of Operations, Training Concept/Plan and Manning Concept and the integration of these plans/concepts into program descriptions. There were two major USAF/RSAF meetings during the last half of 1982, a review primarily to discuss operational, training and manning concepts in Saudi Arabia 14-15 Sep 82[51] and a

Page determined to be Unclassified
Reviewed Air Force Declassification Office

Date: Oct 16, 2018

formal PEACE SENTINEL review in Washington, D.C., 25-28 Oct 82.[52] The Oct review followed an USAF orientation visit to Nassco AFB, Tinker AFB and Boeing Aircraft Corporation.[53] By the end of the year program descriptions for PEACE SENTINEL I (Aircraft Acquisition), PEACE SENTINEL II (Training) and PEACE SENTINEL III (Contractor Maintenance and Support Services) were in Saudi Arabia for presentation to the RSAF or in final stages of approval. USAF objectives at the end of the year were to provide PEACE SENTINEL II and III SOA's to the RSAF no earlier than Mar 83.[54]

(U) Facility construction, an RSAF responsibility, was identified as a major problem by the RSAF dictating the establishment of an interim operating location at Riyadh. USAF studies/surveys to determine the full impact of an interim operating location were being planned at the end of the year.[55]

PEACE QUEST (U)

(U) PEACE QUEST is the nickname for the Saudi Arabian Government's acquisition of the Mark XII Mode 4 Identification Friend or Foe Selective Identification Function (IFF/SIF) system (commercial equivalent). This system will help enable the RSAF, Saudi Arabian Land Forces (SALF) and the Royal Saudi Naval Forces (RSNF) to identify friendly aircraft operating in Saudi Arabian airspace. An LOA is in development that will provide for design, development, production and

in-country installation and support of the IFF/SIF system. Five million dollars of PEACE SENTINEL Communication Security funds, subcase SR-D-53M, were transferred/loaned to Aeronautical Systems Division to initiate PEACE QUERY.[56] This action was necessary to protect PEACE SENTINEL requirements and will be repaid after the signing of the PEACE QUEFY LOA.

PEACE QUIET (U)

(U) PEACE QUIET is the [redacted] given the USAF requested program for a narrow Band Secure Voice Device (SVD) telephonic communication system. The United States Government (USG) was asked to provide a demonstration test, acquisition and contractor logistics support for 59 commercially equivalent SVD units. In-Kingdom demonstration tests of operational units were conducted on 16-25 Oct 82 by Technical Communications Corporation (TCC) and Rockwell - Collins Company.[57] Both devices, TCC/CSD-303 and Collins/VP310 qualified in the demonstration tests.[58] However, procurement of the original 59 SVDs was terminated because the USAF was designated as lead service for the selection and procurement of secure voice communication systems for the Saudi Arabian Armed Forces.[59] The USAF requested the PEACE QUIET LOA be modified to reflect an initial purchase of 80 SVDs.[60]

Munitions (U)

(U) A U.S. Air Force meeting was held 14-15 Oct 82 at Hill AFB, Utah, to review and discuss issues and problems regarding the RSAF munitions program. A decision was made to hold quarterly reviews due to the magnitude of the RSAF munitions program and the amount of activity. These reviews will be scheduled in Mar, Jun, Sep, and Dec in order to provide current status of the RSAF munitions program on a quarterly basis. The semi-annual USAF/RSAF review will be scheduled, if possible, to complement two of these quarterly reviews.[61]

(U) The RSAF advised that they wanted 300 of their requested 1000 inert MK-82 bombs delivered in-kingdom, by the most expeditious means, to avoid a training stop-page.[62] Air delivery of 300 inert MK-82s was accomplished in Dec 82 and 702 inert MK-82s were delivered to the Freight Forwarder at Wilmington, N. C. and scheduled to depart 4 Jan 83 aboard vessel Saudi Mecca.[63]

(U) In anticipation of an early Jan 83 joint USAF/RSAF munitions meeting, a USAF meeting was held 1-3 Dec 82 to review open action items and establish a coordinated USAF response for unresolved issues.[64]

Munitions Requirements (U)

(U) P&A for 2,820 FMU-110B Fuzes, requested by the RSAF has been received. However, the only source for these fuzes is U.S. inventory and it has been determined that the FMU-110B is not releasable at this time.[65] P&A for 1,000

Date: Oct 10, 2018

GSU-21/B Active Optical Target Detectors has been received and an LOA with an expiration date of 28 Jan 83 was countersigned 1 Oct 82.[66] Munitions requirements for which FMS has been requested, are as follows: (1) Fuze MK-303, 60; (2) Rocket MK-8, 60; (3) Rocket Motor MK-17, 120;[67] and (4) Booster Fuze 1/B, 2200.[68]

Fighter (Update) (U)

(U) In accordance with an RSAF request, the development of a Rapid Runway Repair (RRR) TAFT LOA was cancelled. On 18 Aug 82, the RSAF advised SO USAF/PRIS of their decision to procure RRR equipment and training from the United Kingdom.[69]

(U) As reported in the previous Semi-Annual History HQ USAF/PRIS developed three LOAs to provide CONUS training, for the RSAF, during FY83. One LOA, designated SR-D-TEF/TEG, contained all technical training needs at an estimated total cost of $5,101,104. The second LOA, designated SR-D-TEH/TEL, included only UPT/F-5 training requirements at an estimated cost of $27,332,842. The third LOA, designated SR-D-TEK/TEL, provided flying/aircrew training and Professional Military Education (PME) at an estimated cost of $13,725,242. All three LOAs had an expiration date of 28 Sep 82. However, at RSAF request, the expiration date of all three LOAs was extended to 28 Oct 82.[70] LOA SR-D-TEG/TEL was accepted by the SAG on 13 Sep 82 and implemented on 5 Nov 82.[71] LOA SR-D-TEK/TEL was accepted by the SAG on 4 Oct 82 and implemented on 16 Nov

Date: Oct 16, 2012

82. LOR[72] SR-D-TFF/TAC was accepted by the SAG on 19 Oct 82 and implemented on 22 Nov 82.[73]

(U) On 5 Sep 82, USAFSAC/SAF advised the USAF that the RSAF had requested the SR-D-FFA (C-130 TAC OPs TAFT) be cancelled due to high cost.[74] However, subsequent RSAF reassessment of this TAFT requirement resulted in an RSAF decision not to cancel the proposed FMS. Match was in-Kingdom for acceptance and signature.[75] Therefore, in response to an RSAF request, the expiration date of SR-D-NFA was extended from 15 Oct 82 to 30 Nov 82.[76] A second extension of SR-D-NFA was authorized on 1 Dec 82. The C-130 TAC OPs TAFT, LOA SR-D-NFA, was finally accepted and signed by the SAG on 11 Dec 82 at the estimated total case value of $1,514,439.[77]

(U) In response to an RSAF request, reported in the previous Semi-Annual History, HQ USAF/PRIS prepared and processed Amendment No. 1 (DD Form 1513-1) to FMS case SR-D-TCU, to extend the F-5 FTR OPs TAFT coverage for an additional three years. Amendment No. 1 to SR-D-TCU was tendered to the RSAF on 12 Jul 82. However, so that there would be no break in TAFT service for the RSAF during the acceptance phase of the 1513-1 amendment process, HQ USAF/PRIS took the following actions: (1) added the personnel manning required to extend the F-5 FTR OPs TAFT coverage to the basic case, SR-D-TCU; and (2) processed DD Form 1513-2 modifications that transferred excess funds from nine older training cases to case SR-D-TCU. The movement of

Page determined to be Unclassified
Reviewed by Air Force Declassification Office

Date: Oct 16, 2018

these excess funds to case SR-D-TCU was to provide for short term financing of the initial TAFT extension effort pending acceptance of Amendment No. 1.[78]

(U) Subsequent to tendering Amendment No. 1 to SR-D-TCU, it was determined that "In-Country Support Services and Dependent Schooling" for the F-5 FTR OPs TAFT extension would be funded under "PEACE HAWK VIII rather than by Amendment No. 1. The deletion of these two funding requirements and the addition of excess funds to the basic case required that WD USAF/PRIE prepare, process and tender a new/revised Amendment No. 1 to SR-D-TCU in order to reflect the adjusted funding requirements for the TAFT extension. Therefore, a new Amendment No. 1 to FMS case SR-D-TCU was processed. Notification was issued cancelling the original Amendment No. 1.[79]

(U) As a result of recent Defense Security Assistance Agency (DSAA) instructions, all extensions of TAFT services beyond the time period funded in the original case will require the development of a new LOA, in lieu of DD Form 1513J-1 amendment action; a procedure previously authorized. Consequently, the revised Amendment No. 1 to FMS case SR-D-TCU, that had been prepared by WD USAF/PRIE, and was undergoing the examination process, will be restructured into a new F-5 Instructor Pilot (IP) TAFT LOA that will extend the TAFT coverage originally requested under FMS case SR-D-TCU. The FMS case designator assigned to the new LOA is SR-D-YFJ.[80]

Date: Oct 18, 2010

(U) The RSAF have officially requested that the Supply Advisor TAFT, LOA SR-D-TFD, be extended to provide coverage for an additional two years.[81] HQ USAF/PRIS has initiated action to develop a new LOA to satisfy the RSAF request. The personnel manning under this proposed LOA will remain as previously established for this TAFT and will provide TAFT coverage in Saudi Arabia through Jul 85, for a total of three manyears. The lead case designator assigned to the new LOA is SR-D-TFK.[82]

(U) The RSAF have formally requested an LOA to provide a two-year extension of the three-man F-5 Instructor Pilot (IP) TAFT currently under FMS case SR-D-TDR.[83] HQ USAF/PRIS has initiated action to develop a new LOA to satisfy the RSAF request. The personnel manning requirements under this proposed new LOA will remain as presently established and implemented under FMS case SR-D-TDR. Therefore, the personnel assignment flow of TAFT members under this new F-5 IP TAFT LOA will be time-phased to coincide with the existing replacement schedule of those F-5 IPs completing tours under FMS case SR-D-TDR. This manning continuity will provide uninterrupted coverage in Saudi Arabia from 1 Sep 83 through 1 Dec 85, for a total manning requirement of six manyears.[84]

(U) HQ USAF/PRIS has furnished the RSAF with a proposal that recommends the consolidation of the three USAF F-5 IP manpower spaces, allocated to the extension of FMS case SR-D-TDR, under the new F-5 IP TAFT LOA, SR-D-YFJ.

IAW EO 13526, Section 3.5
Date Oct 16, 2018

RSAF concurrence/non-concurrence of this proposal is required prior to proceeding with the preparation of replacement LOA for SR-D-TDR.[85]

(U) The RSAF have formally requested an LOA to provide a two-year extension of the F-15 IP TAFT currently under FMS case SR-D-TDV.[86] HQ USAF/PRIS has taken action to prepare a new F-15 IP TAFT LOA to satisfy RSAF request. The personnel manning required to provide an additional two-year extension of the F-15 IP TAFT will continue to consist of eight USAF F-15 IP and seven Administrative Specialists. The FMS case identifier for this new TAFT LOA is SR-D-YYL. The personnel selected to satisfy this TAFT requirement will provide continued coverage in Saudi Arabia from Dec 83 through Jul 87.[87]

(U) The SALF have officially requested an LOA to provide a two year extension of Language Training Detachment (LTD) coverage currently being provided under FMS case SR-D-TDV. HQ USAF/PRIS has initiated preparation of new LTD LOA to satisfy SALF request. The personnel manning required to provide an additional two-year extension of the LTD will continue to consist of one GS-9 and two GS-7 English Language Instructors. The FMS case identifier for this new LTD LOA is SA-D-TDW. The personnel assignment schedule will be the same as presently established for the LTD personnel under FMS case SR-D-TDV, and will extend the present LTD coverage in Saudi Arabia from Jun 83 through Jun 85, for a total funding requirement of six manyears.[88]

Date: Oct 16, 2018

(U) The RSAF have formally requested the services of a Defense Institute of Security Assistance Management Mobile Training Team (MTT) to provide RSAF personnel responsible for the management of FMS programs, with an understanding of the FMS process. The MTT will require three officers and two civilians (GS-13) and be located at King Khalid, Riyadh, Saudi Arabia. The MTT will be funded under Blanket Order Training Case SR-D-TEK/TML.[89] The cost estimate for the MTT is $44,200.[90]

(U) The programmed training requirements in FMS training case SR-D-TEN/TMJ have exceeded the LOA value by approximately 65%. This sharp increase is the result of the addition of sixteen additional undergraduate Pilot Training/T-5 training spaces to this case. It is anticipated that the LOA value of case SR-D-TEN will have to be increased by an estimated $17.8 million, through DD Form 1513-1 amendment action, in order to reconcile this existing funding shortfall.[91]

Reviewed by Air Force Declassification Office
IAW EO 13526, Section 3.5
Date: Oct 16, 2018

Europe/NATO Division

Introduction (U)

(U) The Europe/NATO Division had one personnel loss and one gain during this period, and is currently comprised of 13 professional staff and four clerical personnel.

Austria (U)

(U) Certain Foreign Military Sales (FMS) with the Austrian Air Force amount to less than $3 million for 21 cases. Austria has no major Security Assistance (SA) program with the United States Air Force (USAF).

Belgium (U)

(U) The Government of Belgium remains active in the FMS environment with approximately 90 FMS cases valued at $1.9 billion. The largest portion of these funds ($1.79 billion) is devoted to the F-16 HARVEST PARTNER 1/ program.

(U) The most interesting development in the Belgian FMS program is the request for a Letter of Offer and Acceptance (LOA) for a follow-on buy of 44 additional F-16s. 2/ The original case called for 116 aircraft to be purchased under a coproduction arrangement. The follow-on case is still undergoing difficult negotiations concerning the continuing coproduction agreements.

Page determined to be Unclassified
Reviewed Air Force Declassification Office
IAW EO 13526, Section 3.5
Date: Oct 16, 2018

(U) Belgium continues to participate in many smaller FMS programs such as the F-16 supply support arrangements. 3/

(U) FY 83 FMS Training 4/ for Belgium consists of quotes for a total of 5 students in Defense Security Assistance Management, Electronic Warfare, Weather Equipment, Flight Safety, Technical Instructor and Language Instructor Courses estimated at approximately $25,000. Pilot training requirements are met through participation in the Euro-NATO Joint Jet Pilot Training (ENJJPT) program.

Canada (U)

(U) Canada has remained active in FMS primarily through AFLC ILC logistic support purchases. The joint project PEACE TOWER (between Canadian Forces and the USAF) for Region Operation Control Centers (ROCCs) continues; case value is near $43 million. (U) FY 83 FMS training 2/ for Canada consists of quotes for approximately 100 students in various courses including Electronic Warfare Operations, Defense Security Assistance Management, Experimental Test Pilot, Flight Test Engineer, F-5E FWIC, Flight Nurse, Air Command and Staff College, Air War College, Space Systems, Flight Safety, and Air Intelligence. The estimated value is approximately $1,350,000.

UNCLASSIFIED

Denmark (U)

(U) Denmark has slightly increased its FMS involvement over last year's figures. There are approximately 80 Danish FMS cases with a total value of $1.04 billion.

(C) As one of the European Participating Governments (EPG), Denmark's largest FMS involvement continues to be the F-16 coproduction program (HARVEST FALCON IV 4 ESB/58 aircraft). 2/ Although no official request has been made, the Danish Air Force is reportedly preparing to ask for a follow-on buy of a small number of additional F-16s.

(U) Denmark has several smaller FMS programs such as the F-16 supply support case. 3/

(U) FY 83 FMS training 4/ for Denmark consists of quotas for a total of 50 students in C-130 Aircrew, Squadron Officer School, H-3 Pilot Qualification, Undergraduate Navigator, Electronic Warfare Operations, Flight Safety, Defense Security Assistance Management, Aerospace Medicine, Air War College and Contract Administration courses. Total estimated value is approximately $670,000. Pilot Training requirements are met through participation in the ENJJPT program.

Euro-NATO Joint Jet Pilot Training (ENJJPT)

(U) ENJJPT is a cooperative undergraduate pilot and pilot instructor training (UPT and PIT) program that has been in development since 1973. ENJJPT began operations on

UNCLASSIFIED

Page determined to be Unclassified
Reviewed Air Force Declassification Office
IAW EO 13526, Section 3.5
Date: Oct 16, 2018

1 October 1981 at Sheppard AFB, Texas, and is the most significant project of its type that has been undertaken among allies during peacetime. Training allied pilots together will do a great deal to further enhance rationalization, interoperability, and readiness. The nations involved in the program are Belgium, Canada, Denmark, Germany, Greece, Italy, Netherlands, Norway, Portugal, Turkey, United Kingdom, and the United States. 9/ The program is based on the principles of proportionate sharing of program costs and proportionate instructor pilot (IP) manning. The US share of the cost, and funds requested for FY 84, amount to $52.1 million. The Sheppard AFB program is the short-term solution (through 1991) for providing joint NATO fighter pilot training. The ENJJPT Working Group which developed and planned the operation at Sheppard AFB is now developing the plans for a long-term solution (beyond 1991). The long-term solution will consider a single base, possible European site, and include lead-in fighter training. The current operation is managed by a multinational steering committee and will continue until the long-term solution is implemented.

(8) During the planning stages for the short-term solution, it was anticipated that the ENJJPT pilot production would increase steadily to 320 by FY 87. Recent events, however, make that growth figure doubtful. The Netherlands participated in the program with 49 student entries in FY 82, but due to budgetary constraints have been forced to reduce entries for FY 83/84

Page determined to be Unclassified
Reviewed Air Force Declassification Office
IAW EO 13526, Section 3.5
Date Oct 16, 2018

to 22. This has had a significant impact on expected program growth and will result in less than programmed production in the out years.

(U) While program growth will be less than expected, continued US involvement and participation is paramount to the success of ENJJPT. Without US participation, which will be kept constant as US student entries permit, ENJJPT would not be cost effective for the remaining nations and the program would collapse. Serious problems would be created for nations like Germany who are programming all of their student pilots into ENJJPT. Further, lack of US participation would undermine current efforts by the US to urge NATO nations to increase their defense spending.

(U) On 23 October 1982, the first ENJJPT class (Class 83-01) graduated. Of the 12 US students who entered with the class in October 1981, 94 received wings as USAF pilots. Other graduates included 11 Germans and 4 Norwegians. All US graduates were fighter, attack, reconnaissance qualified, adding credibility to the quality of training received in the fighter pilot oriented program.

(U) Due to the inability of some nations to provide their fair share of TPs for the program, the US originally committed 64 additional TPs over its proportionate share to fill shortfall IP positions. (The additional 64 positions were fully reimbursable from the nations with the shortfall). Therefore, the US was

Page determined to be Unclassified
Reviewed Air Force Declassification Office
IAW EO 13526, Section 3.5
Date Oct 16, 2018

building to a total presence of 196 IPs at Sheppard AFB (132 required; 64 shortfall). The Netherlands reduction of student entries, however, created an excess IP situation and the US has reduced its total IP commitment for the program to 174 in order to balance the IP/student ratio.

(U) Overall, the program is progressing well with exceptional cooperation among the user nations. There are no significant obstacles in the foreseeable future which would prevent a successful program throughout the short-term solution.

France (U)

(U) The French FMS program constitutes 30 open cases amounting to $63.5 million. Currently, there are no major items of equipment sales.

(U) France signed an LOA [10] for the purchase of an AN/MST-T1 Multiple Threat Emitter Simulator. This $16.2 million sale is part of the hardware procurement of the Airerw Electronic Warfare Tactics Facility (AEWTF). France has requested Price and Availability (P&A) data on the AN/MPQ-53 AAA radar simulator for their second site. The total cost for the French portion of the AEWTF is estimated to be $74.0 million.

(U) The US/French Memorandum of Understanding (MOU) on joint research and development of a modernized C-135 tanker is about to be completed. [11] This MOU covers the development phase while the production phase is being conducted using a series of

Page determined to be Unclassified

Date: Oct 18, 2018

annual FMS cases. Estimated cost to reengine the 11 French aircraft is $275 million. The first converted aircraft was completed on 22 June 1982 and is now undergoing operational testing.

(U) On 14 March 1982, France requested Boeing to conduct an E-3A demonstration. Boeing leased an Air Force E-3A on 14 June 1982, and conducted three test flights from 28 June to 9 July 1982. The LOA 11/ for USAF technical assistance during the demonstration amounted to $107,635. The tests were very successful and may eventually lead to the purchase of the E-3A.

Federal Republic of Germany (FRG) (U)

(U) The FRG is one of the largest FMS customers in worldwide SAs, with more than 350 FMS cases valued at $1.6 billion. 13/ Current significant programs include: PEACE ILLER (Purchase of 425 AGM-65B Maverick missiles); NATO E-3A program; PEACE PEEK (Equipment update of airborne collection platforms, Breguet 1150 "Atlantique" aircraft).

(U) The USAF and German Air Force (GAF) developed a Memorandum of Agreement (MOA) pertaining to the sale of the 66 F-104G aircraft at Luke AFB, Arizona. 14/ The MOA became effective on 20 August 1982. The US Government (USG) bought the GAF F-104G aircraft which were then in turn purchased by Taiwan.

(U) The GAF terminated the Sheppard Agreement 30 September 1982, which provided support for the GAF dedicated UPT program at Sheppard AFB, Texas. The maintenance agreements with Northrop

to service GAF T-37/T-38 aircraft was renegotiated and now provides support to the EMJJPT program. GAF T-37/T-38 aircraft are now supporting that program under the EMJJPT MOU and a bilateral MOA between the GAF and USAF.

(U) The GAF F-104 training program at Luke AFB, Arizona will terminate with the last flight and closing ceremonies on 16 March 1983. There will be no follow-on GAF training at Luke AFB and the F-104 aircraft, spares, etc. were sold to Taiwan. All GAF F-104 equipment will be removed from Luke by 30 September 1983.

(U) GAF continues their F-4 aircrew training at George AFB, California as a dedicated program. The LOA value for the program for FY 83 is $38.5 million. 13/

(U) The USAF moved the RF-4 Replacement Training Unit to Bergstrom AFB, Texas in FY 82. The GAF continues to train ten basic and four instructor aircrews per year in this program.

(U) The GAF training program for FY 83 includes 14 LOAs valued at more than $100 million total.

Greece (U)

(U) The Government of Greece (GOG) remains very active with 22C cases valued at about $723 million. Logistic support through AFLC ILC, and weapon system programs through AFSC, comprise the majority of the current activity.

(U) The Hellenic Air Force (HAF) is continuing efforts to improve its forces with advanced weapons, additional training aircraft, modernized command and control, and a complete depot capability operated by the Hellenic Aerospace Industry.

(U) The GOG has been in the process of evaluating the operational characteristics of the F-16, F-18, Tornado and Mirage 2000. During October 1982-January 1983 the GOG formally evaluated proposals by contractors for the F-16C/D, F-18A, Mirage and Tornado aircraft. The number of aircraft to be purchased, including 10 percent [illegible] spares, is 60 [illegible] (36 and 6 or 90 and 10) with an option for an additional purchase of 30. To support the acquisition of a new major weapons system by the HAF, the GOG has asked the contractors involved for offset provisions beneficial to the GOG. Included in the HAF evaluation will be in-country assembly, management of components, technology transfer, and export considerations. The HAF has been actively discussing such potential arrangements with representatives of the various companies involved.

(U) In July 1982, the GOG accepted an LOA 16/ for the expansion of its existing PEACE GREEN communications system. The case expands the radio links capacity Line of Sight, Knife Edge Diffraction tropo as well as installs additional multiplex equipment in the already installed and operating independant PEACE GREEN system.

With acceptance of the basic LOA, the GOI requested an amendment to further expand the system, bringing the total value of the case to $20 million.

GOI now reportedly possesses 100 AGM-65A Maverick missiles. An LOA for an additional 200 Maverick missiles was signed in November 1980.

Italy (U)

(S) FMS activity for the Government of Italy continued to level off during this six month period. There are 31 open cases amounting to approximately $23.0 million. 17/ There are still no major items of equipment sales, the majority of cases continue to be for support equipment, publications, spare parts, and training. Italy is seeking to lead a European consortium to coproduce the AGM-65D ITR Maverick for NATO needs.

(U) FY 83 FMS training 18/ for Italy consists of quotes for approximately 30 students in Defense Security Assistance Management, Flight Test Engineer, T-38 Lead-In, and Undergraduate Navigator training courses. The estimated value is approximately $2.1 million. Effective with FY 84, Italian Air Force pilot training requirements will be met through their participation in the ENJJPT program.

NATO (U)

(U) The NATO Worldwide Military Command and Control System hardware subsystem continue on schedule.

(U) The NATO ETID [illegible] launch is scheduled for October 1983, but it now appears it will be delayed until 1984. The NATO [illegible] program has been cancelled.

(U) NATO has requested an LOR for a SACEUR Secure Voice Conferencing System to link all major NATO commanders with HQ SHAPE via a secure conference loop.

The Netherlands (U)

(U) The Netherlands is the most active of the four EPG in FMS. The Dutch have approximately 800 FMS cases at a total value of $7.8 billion.

(U) The largest Dutch FMS involvement is with the F-16 coproduction effort (HARVEST EMPEROR III - $1.89/102 aircraft). 19/ The original 102 aircraft have been followed by a Dutch request to buy 111 additional F-16s in a series of annual buys. 20/ Two of these incremental purchases were signed this past year. The first of this year's LOAs was for 20 aircraft 21/ and the second was for 12 aircraft. 22/ A request for the remaining follow-on aircraft is expected soon.

DECLASSIFIED

Date: Oct 16, 2018

(S) Another major Dutch FMS program continues to be the ALQ-131. 23/ The Royal Netherlands Air Force (RNLAF) plans to buy 75 pods in a series of incremental purchases. Twenty-six pods have already been bought via FMS cases. 24/ A request for an LOA for the third slice was received during this period and is being processed. 25/ Additional requests for modifications to existing ALQ-131 equipment 26/ and for new equipment 27/ to be added as improvements to the ALQ-131 are also being worked.

(S) The Dutch continue to be very active in other FMS areas such as modified MK-82 bombs 28/ and supply support arrangements. 29/

(S) FY 83 FMS training 30/ for The Netherlands consists of quotas for a total of approximately 20 students in Defense Security Assistance Management, Electronic Warfare Operations, Aerospace Medicine, and Experimental Test Pilot courses at an estimated value of approximately $300,000. RNLAF pilot training requirements are satisfied through their participation in the EKJPFV program.

Norway (U)

(U) Norway has remained active in FMS programs with approximately 95 cases valued at $1.5 billion. The major source of Norway's FMS involvement continues to be the F-16 coproduction program (HARVEST PARTNER IV - $1.7B/72 aircraft). 31/

Page determined to be Unclassified
Reviewed Air Force Declassification Office
IAW EO 13526, Section 3.5
Date Oct 16, 2018

(U) Norway completed a very interesting test program at the Air Force Electronic Warfare Evaluation Simulator during this period. 32/ Based on the results of these tests, Norway is evaluating which electronic warfare equipment to buy. Indications are that the Royal Norwegian Air Force (RNAF) will ask for an LOA for the F-16 [illegible] the end of [illegible].

(U) Norway also has smaller FMS cases for such things as the F-16 supply support arrangements. 33/

(U) FY 83 FMS training 34/ for Norway consists of quotes for a total of approximately 40 students in C-130 Aircrew, Contract Administration, Defense Security Assistance Management, Aerospace Medicine, Electronic Warfare Operations, Air War College, Personnel Officer, Undergraduate Navigator, Aircraft Maintenance and Terminal Instrument procedures courses. The estimated total value is $955,000. RNCAF flying training requirements are met through their participation in the ENJJPT program.

Portugal (U)

(U) The Portuguese continue in their efforts to modernize their air force. The USAF was called upon to support the sale of 30 additional A-7 aircraft by providing 19 TF-41 engines to the Navy. 35/ Portugal purchased 27 Maverick missiles in 1982. 36/

Spain (U)

(U) Deliberations of the Spanish Air Force (EAF) for a new fighter resulted in selection of the US Navy F-18.

(U) During September 1982, 18 C-7 aircraft were delivered, completing project PEACE CARGO.

(U) The PEACE BIRD program to modernize the EAF wholesale logistics system continues on schedule. The Requirements and Distribution System operations and maintenance support was purchased through 30 June 1983. 37/

Sweden (U)

(U) The Swedish Air Force purchased a Modular Adaptable Radar Simulator (MARS) for electronic countermeasure simulation. 38/ Initial purchase was in 1979. In 1982 spares for the MARS were purchased so that deliveries of both the MARS and its spare coincide. Delivery is expected in Late 1983.

(U) Sweden expressed interest in the GBU-15 and Maverick alternate warhead. However, proceedings have been limited to discussions only.

Switzerland (U)

(U) Current FMS sales with the Swiss Air Force amount to about $731 million for 42 cases. The major FMS program for the Swiss is the purchase of Northrop aircraft.

As of 30 Sep 82 the Swiss purchased 981 AGM-65B Mavericks and support equipment from the USAF.

(U) The Swiss continue to work with Northrop to flight test a Conformal Countermeasures Pod at Edwards AFB for its F-5 aircraft under FMS Case SY-D-NAB. Production will depend on test success and whether or not Northrop can market at least 125 pods (cost effective quantity). Swiss requirement is for about 40 pods initially - maximum 80.

(U) FY 83 FMS training for Switzerland includes quotas in the F-5 Fighter Weapons Instructor and the Experimental Test Engineer courses. 79/

Turkey (U)

(S) The Turkish Air Force (TAF) FMS program has increased to 103 cases worth $1,022.4 million. The TAF still participates in the F-4, F-104, and F-5 Technical Improvement Programs, and the Cooperative Logistics Supply Support Arrangement.

(U) The TAF received $400 million in SA for FY 82 and has received $400 million under CRA, with a possible $40 million supplemental increase for FY 83.

(U) The UK has two cases [41] valued at $53 million in support of PEACE RAPID. Both cases are being revised to reflect a better estimated value of items sold under PEACE RAPID. Three leases have also been prepared as a result of PEACE RAPID - one has been signed by the UK and the other two are awaiting final approval and signature.

(U) FY 82 FMS training includes quotas for the Air War College [42] and the Experimental Test Pilot [43] courses. In addition the Royal Air Force arranged to participate in the RED FLAG 83-2 exercise. [44]

Yugoslavia [U]

(U) Current FMS with the Yugoslavian Air Force amount to less than $46 million for 17 cases. As a result of Presidential decisions and the visit by the Secretary of Defense, activity with the Government of Yugoslavia (GOY) is expected to increase.

(U) The GOY has accepted an LOA [45] for the purchase of four AN/TPS-70(V)1 radars. Total value is approximately $25 million. The contract negotiations with Westinghouse are scheduled for 15 April 1983. This represents the second significant systems purchase with the DSG/USAF in the past 18 months. (The GOY previously purchased 215 AGM-65B Maverick missiles).
